Bark Ocean Steed of Chatham - New Brunswick

Monday morning April 27th 1868
Lying at anchor off Charles Point
New Bedford Mass, U.S.A.

at 9 A.M. Pilot went on Board and
hove short, — being calm, — most of the
crew being on board at 10^h light
airs from the W. at 11 Capt. made
2 & 3rd mates all came on board —
made sail and stood out to the S
at 6 P.M. stood out passed Cuttyhunk
Pilot having left us at 3 P.M.
wind S. stood out to the W. with
light airs from the S. S. W. at
7 wind hauled suddenly to the
N.E. blowing quite fresh kept
ship to the S. per compass

Tuesday April 28th Steady
breezes from the N.E. steering S.
all day — saw several sail steering
to the W. — All hands employed
in fitting Boats coiling lines &c
1st mate sick confined to his
room, — at night wind still
N.E. and blowing steady

Wednesday April 29th Moderate
winds from the E. and thick weather — Ship
steering to the S. all the P.M. light air
with rain wind hauling gradually to the S
at 4 P.M. wore ship heading S.E. Nothing
in sight all day.

Thursday April 30th Comes in with
moderate breezes from S.W. and plenty of
rain Ship steering S.E. per compass at
6 kept ship S.E. at 10 kept her
S. again all this P.M. quite moderate
Watch fitting boats &c Lat at Merid 38.16
Long by Chrono, 70.00

Friday May 1st Comes in with a
gale from W.S.W. and plenty of rain
Ship working to the E. with all prudent
sail out 2 sail in sight — are in the
Gulf Stream have been for the last 24
hours — Strong breezes from S.W.
Lat at Merid 38.34
Long by Chrono, 67.16

Saturday May 2nd First part strong
gales from N.W. Mid. part quite mild
and pleasant — Lat part strong winds from
S.E. and hazy weather Lat. 38.51 Long 65.21

Sunday May 3rd Strong breezes and
squally weather from S and S W. One sail
in sight this A.M. steering to the E. also
One or Two finbacks - Saw considerable
Gulf Weed this P.M. - Several birds through
the day - In the P.M. considerable saw
at Noon distributed the bibles tracts and
testaments put on board for that purpose
by the New Bedford Port. Society - at sun-
-down strong gales from S W. Ship under
close reefed topsails - Lat. at Merc 39.26
Long by Chron 68.15

Monday May 4th Strong
gales from the N and clear weather Ship
working to the S under easy sail - nothing
in sight ~~weather~~ employed in fitting crefts
and doing other work about ship
Lat at Merc 39.19
Long by Chron 68.15

Tuesday May 5th Moderate with
light airs from S and calm. at 8 raised
a shoal of Sperm Whales at 9 lowered
all three boats Starb. boat struck
and killed one and took him to the ship
by the other two boats following the shoal
at 11 Waist boat struck at 8 got him
to ship Lat 39 25 Long 62 30

Wednesday May 6th 1868

Came in with strong breeze and cloudy weather at 4 A.M., called all hands and commenced cutting at 10 got one whale in blowing strong and ship so much down that we dared not hook on to the other before clearing away head all hands busy - got head cleared away and set the watch raining hard all day No Obs.

Thursday May 7th Comes in with more moderate weather - started the works at 5 A.M., called all hands hooked on and cut the whale mining machine broke down - cleared up head - the weather very threatening much rain and sudden squalls - nothing in sight all this day No Obs.

Friday May 8th a gale of wind from S and S.E. with heavy showers of rain - hard boiling but managed to keep the fires along - at 7 wind hauled to the W blowing heavy with much rain at 9 A.M. saw a school of sperm whales going slow to the S.W. at 1 P.M. called the works Lat at Merid, 40 24 Long 63, 55 W No sail in sight this P.M.

A School of
Sperm Whales

Saturday May 9th

First part a gale of wind and rain from W with thunder and lightning Ship lying to under mizstaysail at 2 started the work again the weather being more moderate — In the P.M. quite clear — watch employed in bailing and doing other work aboard ship

Saturday June 20th
Good weather with moderate breezes from
the W. Flares in sight at 10
left the ship for the shore at the
Port of Ponta Delgada to obtain
recruits — found plenty of Potatoes
and onions

Sunday June 21th
Light airs and calm — lying off and
on at Flores obtaining recruits — took
on board 100 Bushels of Potatoes and 6000
onions — Sold a quantity of tobacco
found our large Chronometer '4 '14
too slow and the small one '14 only

At Flores

Monday June 22nd 1868
Comes in with light airs from S.W.
and calm. Ship off Flores bound for
Fagal, having obtained 100 Bushels of potatoes
- 6000 Onions &c. Sold about
350 lbs of Tobacco @ 45c per pound
all day water blue and clear with
Tattow Tropis - Sungalls - porpoises a buccoo
skiff back &c. ever indication of sperm
Whales. At sundown Flores bearing
N. by W. Dist. 30 miles - nothing
more in sight - One man by the
name of Smith ran across res-
tore at Flores

Tuesday June 23rd 1868
First part light airs from S.W. and
fine weather. Steering for Fagal
at 9 a.m. sighted the island
took in the larboard boat and put
her over head - put starboard boat on
the larboard boat's oars and took
a boat from overhead for starboard
boat. At sundown Fagal 31
miles Dist bearing S. by E per
compass - nothing more in sight all
day. We have four men we
took from Flores all Portuguese
3 more than when we went there

Wednesday June 24th 1868
all day light babbling air from all points
and calm at 3¹/₂ P.M. hooked on the boats
and went to towing — at 8 came to an
anchor at Fayal harbor in 20 fathoms with
our best larboard anchor — Bk Concordia
having come in some 3 hours before

Thursday June 25th
light air and cloudy weather — employed
on board in coopersing oil to 3 men
Brown Harry and Price deserted while
the boat was on shore

Friday June 26th
light air and fine weather all these 24
hours but our oil on board the Concordia
284 Bbls all told. have heard nothing
from the deserters.

Saturday June 27th
light babbling air and calm with fine
warm weather Took our anchor and
stood out to the south in 30 with
Bk Concordia — Calm

Sunday June 28th 1868
all these 24 hours light baffling air
and pleasant weather - Ship becalmed
on the South side of the island - Mist
and fog part working through

Monday June 29th 1868
all these 24 hours light baffling air
from the N.E. - Ship working to the
N.E. - have five Portuguese green
hank on board & one shipped at
Faral and the other 4 stowed away on
board at Flores, found our large
chronometer 75 miles too far E and the
small one 15 miles,

Tuesday June 30th
all these 24 hours light baffling air
from the N and E. and calms - Ship
working to the N with all sail out
cooper setting up shrouds - saw one
sail steering for Faral - saw the
islands of P. Faral Pico St. George
and Graciosa - saw porpoises
a blue core and shoals of small fish
also land snails, yellow drops and
sungulls, there being good in-
dications for sperm whales.
16 Obs,

Wednesday July 1st 1848
Light baffling wind from the N and E
and calm. Ship by the wind heading
at unit at 10th with all sail set
this morning. sent aloft fore hall yard
bent the sail and set it. Saw
the island of Graciosa bearing S
of the fore compass dist. 20 miles
at 10. Saw several sail all
working to the E but one schooner
that is working W. — Saw a lot of
tallow drops, squalls and touch of
winter blue and clear.

Thursday July 2nd
Light baffling wind from the N and E
and squally weather. Ship by the wind
first on one tack then the other. Then
shifting from one quarter to another ten
times. Several sail in sight all
working to the E. — In the night
heavy squalls and rain.
Lat 40.18
Long 25.49

Friday July 23rd 1868
Came in with a gale from the N.E.
and much weather with some rain.
Ship to the west - heading about E
for Cape Horn. Working up for the shore
ground. - Nothing in sight all day.
At night wind came a little to the W.
with a heavy swell running from the N.

Saturday July 4th 1868
Came in with light baffling air from the
N. and N.W. and cloudy weather. Ship
steering E. by S. for Cape Horn.
Ground. - Eleven miles in sight all round
to the E. - In the P.M. wind haul-
ing gradually to the W. - At sundown 14th
light and calm. - Lightning in the N.
and N.W. - Saw through the haze a great
many yellow drops and a few snowballs.
No birds nor porpoises. - good luck all
day. Sailed at 11 AM 08
Longitude 26.28
N.

Sunday July 5th 1863

Begins with light baffling air from S^W and W^N, and clear weather. Ship was lying to the S^W, with all sail out. - Light sail in sight today all around to the S^W. Water with blue and clear excepting a few low droops. - Seagulls &c. no whales birds or porpoises in sight all day.

Lat at Merid 41.54 N
Long by Chron. 23.35 W

Monday July 6th 1863

Begins with light air Calms, and shows weather - begins from S^W and S^W to S^W. The wind heading S^W and S^W to S^W. Several white in sight all around to the S^W. Water Blue and clear. Saw porpoises several times through the day. The winds are still light and weak ahead - are making very slow progress for the whaling ground. The season will be far advanced by the time we get there. The best we can do.

Today the Lat. 42.18
Long. 23.42

Tuesday July 7th 1868

All the 24 hours light baffling air and calm
what little wind there is being direct ahead
slow getting along this being the fifth day we
have had there light baffling winds from
ahead. This is much more than what I
calculated on finding. I naturally thought we
should have fair winds from ahead to our whole
ing ground, but instead it has been ahead
all the time. The season is now fast pas-

sing away, in a few days more and the sea-
son is up. Thus it is. Man proposes and

God disposes. But somehow I am getting to be
very impatient to get on the whaling ground.
We get a good altitude of the sun but I
was ashamed to get an observation to determine our
longitude. Lat. at noon 48.00

Wednesday July 8th

Begins with light S.W. wind and calm
from S.W. — and hazy weather and some
heavy rain squalls. — Several sail in

sight working to the S.W. some standing
on one tack and some on the other.

This is the best day we have had the
light baffling winds from ahead, and
we fear the season will be up before
we can get on to the ground. To day's

Lat. at noon 43.18 Long 25.36

Thursday July 9th 1868

Remains in N.E. Wind. Sea smooth and calm. Ship making but little progress to the N.E. weather cloudy and showers with rain. Saw four sails all steering to the N.E. Saw no land or animals. But nothing more all day. Lat at mid 43.29 N. Long by Chron 23.52 W.

Friday July 10th

Remains like all for the past two weeks with light baffling air and calm. Ship standing to the N.E. with a light air from the N.E. and showers of rain. Saw two or three sails steering to the N.E. Saw progress for the last two weeks. Saw today two or three birds a school of porpoises some few toadfish. Tallow crops etc. some indication of sperm whales. Lat at mid 44.23 N. Long by Chron 24.18 W.

Saturday July 11th

Moderate breezes from N.E. and overcast with light showers of rain. Ship standing to the N.E. first part. Mid P. Lat part to the N. with light air from N.E. and calm at sundown calm. 4 miles in sight all working to the N.E. Saw one fish back to day. Lat 44.21 N. Long 24.11 W.

Sunday July 12th 1868

Begins with a calm and light baffling air
from S.W. and clear weather. But a
heavy swell from E. — Saw Grampuses
and two finbacks — quite a quantity of
very small landbirds — Yellow throats etc.
Water alternating from a deep blue to a
dark muddy green — in the P.M.
quite a steady breeze from S.W. — saw
six sail all steering to the E.

Lat. at Merc 44.57

Long by Chron. 22.36

Monday July 13th

Begins with moderate breezes from S.W.
and hazy weather with squalls of rain and
fog. Ship starting at 10 A.M. for Canton
with all sail out. In the afternoon
saw several sail all steering to the E.
— Saw a few birds. Seagulls. Landbirds
etc. etc. At noon the wind came
out to the S.W. with squalls of fog.
— Saw one steamer steering to the E.

at 1 1/2 P.M. Lat by Chron. 46.27

Tuesday July 14th 1865

Begins with fresh breezes from S.W. and
goes with them at 10th per compass
with all sail set at 10 AM. Under
the ship to the wind. Saw Hancock's
breeches - saw jacks and crew under
Lat. 48.18
Long 23.24

Wednesday July 15th

Comes in with strong breezes from S.W.
and heavy weather - at 10 AM. Under
course but was born to the S.W. under
all sail. Water very green - saw
Hancock and jacks but no small
boats in the water - very little
indication of whales - at 6 PM. ship
heading out to the S.W. per compass then
being two points and half variation to the
left
Lat at 48.51
Long 23.23

Thursday July 16th 1868

Commenced with light breeze and calm and heavy weather - air from S.W. at 12 light breeze from W. Of the river at 6 per compass 2nd sail in sight today & was looking very much like the large Morris. - Saw 10th diablocks and the small boat in which we landed and shared with two boats. Went boat going on and darning and put fastening - Saw two seals and follow dogs near the water still very green about 3' up for judging ourselves to be in Lat 48.50 Long 22.25 found a little water that was water blue, at 6 P.M. steering at E by S. per compass 2nd point, variable variation Lat at West 48.56 Long by chron, 22.30

Friday July 17th

Went with West breeze from S.W. and overcast with fog and rain. Ship cruising on different tracks rather contrary to the usual patch of blue water in the river in Lat 48.30 Long 22.40 Saw two seals near boat in it. Saw several diablocks several seals and green water. Green water extending to Lat 49.20 in Long of 22.40 working to the S in and out of green water below the line running N.E. Lat at West 49.31 Long 22.45

Saturday July 18th 1868
 Boats with Combs, Jones, Jan. 1st and one
 out with four and six - Saw two seals
 called over the boat - Saw - all of the
 boat shot to the shore - saw
 one fishhook - water green without
 anything in it - saw but one or two
 birds - looks dull and gloomy except
 for the sun - Steered south by the
 then rose ship at 2 and kept by the
 wind until night - saw 4 till light
 saw about 10 seals in the water
 between 11 and 12 ran through a patch
 of blue water - no tall grass - set
 saw one seal in sight - became a
 call it a whaler - but at about 4 1/2
 saw a seal - 2.55 -

Sunday July 19th
 First hard weather with light rain from
 the W. One seal in sight - heading to
 the W. - We are cruising to the W.
 at 1 P.M. spoke the ship - 125 tons - one
 whale - had seen whales but none
 reports several ships have on the ground
 seen had seen whales but none - found
 with the ship - but at about 4 1/2
 saw a seal - 2.55 -

North with 4 seals

Sunday July 26th 1868
First part strong breezes from S.W. and thick
foggy weather ship by the wind heading W
by compass. Saw two or three sail steer-
ing to the W. in the P.M. strong breezes
Lat 45° 38' N
Long 31° 46' W

Monday July 27th
Comes in with a gale of wind and rain from
the W. Ship by the wind on starboard tack
heading to the S.W. under close reefed top-
sails. Nothing in sight all day, most of the
time weather thick and foggy
No obs.

Tuesday July 28th
Comes in with strong breezes and thick
foggy weather. Ship by the wind heading
S.W. One sail in sight. Spoke her proved
to be a Swedish brig, bound for Child-
dahia. Just before on board of her
Nothing more in sight through the day
The water blue and clear with a few
todd's tools. a very few birds

I have the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the matter of the
above named estate. I have the honor to inform you that the same has been forwarded to the proper authorities for their consideration.

I am, Sir, very respectfully,
Your obedient servant,
J. H. [Signature]

I am, Sir, very respectfully,
Your obedient servant,
J. H. [Signature]

Wednesday August 12th 1868
Comes in with fresh breezes from the S.W.
and clear weather. Shift to the wind heading
in N.W. with all sail set. Saw three
or four sail through the day - a great
change observable in the temperature of air and water.
Doubt to our proximity to the Grand
Bank of Newfoundland, as we judge our
selves to be on or near the most extreme south
eastern limit at 4 P.M. comes in foggy
- have seen several schools of lampreys
today at 6 P.M. wind hauling more to
the S. but still thick fog.
Lat 43 16
Long 48.00

Thursday Aug 13th
Comes in with fresh breezes from S and thick
foggy weather. Shift to the wind heading N.
Compass - Saw lampreys, hickies and deep sea
bottoms - also one sail steering to the E.
Experienced strong tide rips and a heavy
ground swell from S.W. - weather at night
looking very threatening but wind still from
S.W. & there being two points westerly
variation bringing the wind about South true
course - In our observations found we are
on the edge of the Grand Bank of Newfoundland
land.
Lat. 43.02 Long 49.40

Friday Aug. 14th 1868

Came in with a fresh breeze from South true,
but at 11 AM the compass, which by the wind
on different tacks - as the wind would baffle or
hail us point or two we would wear "the"
wind dead ahead for our whaling around
saw plenty of Dutch her Bottoms today - sometimes
there would be a dozen in sight at one time
have had considerable rain through the day,
no sails in sight and no fish,

Saturday Aug. 15th

Came in with moderate winds from the N.E.
and calm, - which steering of her compass
with all sail set. - One sail - One
barren and plenty of green pines in sight
in the forenoon - Covered and chased with all
the boat all the forenoon in the afternoon
nothing in sight

Lat. at Merc 42.18'
Long by Chron. 49.19'

Saturday Aug. 22nd 1868

Begins with light breezes from S.W. and fine
weather. Ship to the wind heading S.S.E. under all
sails. Saw one sail today - nothing more
in sight all day. - Little land visible
no sunnells no birds or anything else
everything looking dry. Lat at noon 40.47
Long by chron. 50.24

Sunday Aug. 23rd

Begins with strong breezes from S.W. and fine
weather. Ship to the wind heading S.S.E.
with all fore and aft sail set. - Nothing in
sight all day. - no sails no birds - nothing
indicate whales. dull enough and no mistake
at sundown strong breeze and clouds looking
like a storm. Lat at noon 40.29
Long by chron 49.00

Monday Aug. 24th

Begins with strong breezes from the S.W. and
squally weather with much rain. Ship steering
to the N.W. with all fore and aft sail
set. - saw one steamer steering to the
E. - nothing more in sight all day.
Nothing to indicate whales
Lat at noon 48.09

Tuesday Aug, 25th 1868

Comes in with a strong gale from S.W.
with squalls and much rain - Ship steering
N. E. W. per compass. under all prudent
sails - Saw several birds and one school
of porpoises - Several Portuguese men of war
at 4 P.M. wind hauled to the N. and
S. E. blowing only a moderate breeze

Lat by Gal. 41.45

Long by Chron 47.56

Wednesday, Aug. 26th

Begins with moderate breezes from the E. and
overcast with some dew. Ship steering N. E. W.
per compass with all sails but the topmast sail
out. Nothing in sight all day not a bird
or porpoise till near dark about here and no
mistake - at sundown shortened sail and
kept ship off N. E. W. per compass

Lat 41.40

Long 48.00

Thursday. Aug. 27th 1868

First part light balling wind from the S.W.
and calm weather and somewhat overcast. Ship
steering W. by N. with all sail out. Nothing
in sight. At 10¹/₂ A.M. raised sperm
whales. - nearly calm and the whales quite
still. Lowered two boats and at 11¹/₂ Searb.
boat struck a large one - got good blood from
him. and the Whist boat chased the loose whales.
Searb. boat lowered at 12 and at 12¹/₂ Whist
boat struck a loose whale. Searb. boat's whale
cleared his strand and afterwards gave us much trouble.
Finally killed both whales and got them to the ship.
At 5¹/₂ P.M. at 6 endeavored to hook on to one
of the whales with the view of cutting the head
square off and getting the body in but coming
on dark and raining very heavy so we could not
hook the long lights burning we gave up the attempt
to cut at night but wait until morning
all night blowing ~~strong~~ and raining heavy
wind changing from S.W. to N.W. and to E. by
whales were ~~in~~ alongside all night being
the whole length of the shute chain.

Sperm Whales
Dark One Large One

Cut Head-Male but the weather
and broke the steering apparatus.

Friday Aug. 28th 1868
All day blowing a gale from N.E. and cloudy
weather being very rough for cutting. But at
5 A.M. hooked on to the smallest whale - cut
head nearly off and then let it remain hanging
and rolled the body in at 9 one of the whales
got foul of the reeder with his jaw and broke the
patent steering apparatus to very badly rendering
it unfit for use. - Got handspikes large blocks
of wood and other things and steadied the reeder and
then went on cutting the whale again. At 11 got
the body all in and the weather being too rough
to take the head - started the works and commenced
bailing - all the P.M. strong breezes and a heavy
swell from the North. - Saw one sail steering
to the S.E. Lat 41.28
Long 47.16

Saturday Aug. 29th
Comes in with quite moderate breezes from
N.E. and clear weather Ship lying by
the whales at 5 A.M. hooked on to the
largest whale - got the head off and body
in in the A.M. - in the P.M. took
the head in the other head still
hanging by the carcass. - Started the
works again - nothing in sight all
day. Lat 40.43
Long 47.46

Sunday Aug. 30th 1887
all these 24 hours light. baltic winds
from the N and E and fine pleasant
weather. At 9 hauled the other sheet
up. ice and hooked on to it at 12
had the sheet all in but bailing the
cave — started the works again — Oil
running down the lubber very fast
everything apparently about with oil
from the cabin to the forecabin — the
weather very warm — in the P.M.
bailed the cave — Lost part of this
sheet in cutting. Lat at Merid 40 02
Long by Chron 48 16

Long by Chron 49 16

Tuesday Sept 1st 1868
Came in with light showers of rain
moderate breezes from the NW and a
short squall from the NW in
part of the latter part of the night
had constant showers that retarded
our boiling. Ship is heading to the
N under foresail and lower main top
sail and foremast staysail. Today
stowed about 60 Bbls of oil in the
main hold. At 12 got through
with the books and commenced boiling
on the heads. Then boiling was
suspended on account of the boiler being
blasted so much. There is great smoking
over black oil. Found that we could
not put it into the hold and took it
out again immediately. Saw today
two seals sleeping to the N.
Have for the last two days found a
strong current setting to the NW
Lat 39 41
Long 50 30

Wednesday Sept 2nd 1868

Came in with light breeze from the W and shower ship. The wind to the N with nothing but foresail and lower maintop sail set. All hands were hauling and stowing oil in the main hold. One sail in sight steering to the E.

Lat. at Merid 40 m

See Blackfish

Thursday Sept. 10th 1868

Came in with light, bubbling air from the
S and hauling gradually to the N. and NW
at 10 AM, wind from the NW light
with fog. all the AM, among heavy tide-
fish & being no ice, surface on south eastern
edge of the Grand Banks of Newfoundland
saw Blackfish - at 2 PM, saw
Blackfish again, lowered for them and
saw them no more. at 3 PM light is
up - one seal in sight - all the PM
steering to the E. nothing more in
sight. Lat. 42° 44' N
Long by Chron. 48° 05' W

Friday Sept 11th

Came in with strong breezes from both
and overcast with some rain - rather poor
sailing. all the AM, standing to the S
to with all precedent sail, all in the
PM, stand to the SW and back again
to the NW. - all day strong breezes
and foggy weather - saw one sail in
the AM, steering to the N. and in
the PM, one steering to the E. by the
wind. - all last night standing by
the wind to the NW. - have seen but
a very few birds and only one school
of fish. Lat. 42° 00' N
Long. 47° 30' W

Saturday Sept 12th 1868

Came in with light winds from the
N.E. and some weather ship by the
wind to the N.E. and E. — One sail in
sight — Saw Blackfish lowered three
times and took one fish to West Point.
Lots of porpoises also in sight — all the
P.M. steering N.W. for company — rather
soon seeing all day — being misty — at
sunset came to the wind, — nothing more
in sight all day. Left at 42.15
Long by Chron 48.00

Sunday Sept 13th

Came in with moderate breezes from E.N.E.
and hazy weather with a heavy swell
all day from the E. — One sail in sight
in the P.M. — Ship cruising to the W.
with all sail out making a zigzag
course in the P.M. saw a great many
Blackfish — Cowfish and porpoises at 3
P.M. heaved to the wind heading to the
S.E. — Saw one finback today
but no sperm whales — all the
Blackfish going to the windward about
E.N.E. for company and going quick
— running through Blackfish about
two hours — did not look for them

Wednesday Nov. 11th 1868

Came in with a gale of wind from N.W.
and rain - ship & the wind came to
under storm sails - Flores and Carro
bearing S.E. for compass but 25 miles
but not in sight - at 11 A.M. more mod-
erate - kept ship off S.E. by E - at
2 raised Carro - bearing S.E. winds
strong from the N.W. at 7 P.M. passed
Carro bound for Hazel - running all
night

Thursday Nov. 12th

Came in with strong gales from the N.W.
and squally weather. Ship steering S.E. for
compass. Under close reefed topsails for Hazel
at 8 A.M. blowing heavy in squalls and
a very heavy sea on wave to heading up
at 2 P.M. saw two sails today steering to the
E. & S.E. lying to all P.M. and
night - wind going down but still
some heavy squalls and a very heavy swell
setting in from the N.W.

Lat at merid 40° 06'

Friday Nov. 13th 1868

Comes in with light baffling air from S. W. and squally weather - Ship the wind heading S. S. E. with all sail out - Saw the Islands of Fayal - Pico - St. George and Graciosa - West end Fayal bearing S. S. W. per compass Dist. by Cal, 45 miles - All day steering in by the wind towards St. George - at sunset tacked ship when 4 miles S. W. of the W. end of St. George - heading S. W. per compass for the passage between Fayal and Pico - light baffling winds from S. E. all right working up through the passage;

Saturday Nov. 14th

Comes in with light baffling air from the S. W. and fine weather - Ship hove to and on at Fayal - at night stood out to the S. W.

Sunday Nov. 15th

Comes in with strong breezes from the W. S. W. and fine weather - Ship cruising off to the S. W. of Fayal - for whales - nothing in sight all day, but two sail

Monday Nov. 16th 1868

Comes in with strong breezes from the NW
and squally weather ^{1st} at 8 AM stood
in for the passage between Pico and Pual
arrived American ship ~~the~~ American
Union of New York from London in
distress - also arrived Bk. Fredonia Burke
11 days from Boston - all night ship
lying off and on at Pual

Tuesday Nov. 17th

Comes in with strong breezes from N.W.
but hauling to the S.W. and S.
Ship lying off and on for the purpose of
getting off recruits. Shakes &c - Got all
into a lighter but coming on rough did
not go out to ship with them - ship
going to off to the leeward of passage. blow-
ing heavy from the S. with rain

Wednesday Nov. 18th

Comes in with a gale from the S. and
much rain - ships in the harbor riding
heavy at anchor - One brig. English
came in to an anchor today

Thursday Nov. 19th 1868

Came in with moderate breezes from the NW and quite clear weather. at 8 AM Bk come in to the passage. had had very bad weather in the last blow. — Took on board from shore 271 Bbls of Casks in shooks being 10 packages sent out from home per Bk Fredonia — also took from Bk Fredonia one Steering Apparatus being Reeds patent. — also from shore 60 Bu. of Irish potatoes 20 do Sweet — 100 pumpkins — 30 doz eggs &c — at night on going on board found that one man William F. Bridonhall missing having no doubt deserted from the boat while on shore — stood out to the north through the passage with the view of going on shore again in order to get the man thus behind — all night strong gales with heavy squalls — carrying on ball in order to hold up. —

Friday Nov. 20th 1868

Came in with a heavy gale from S.W. ship carrying on sail to hold up but find we are going to the leeward drifting off all day blowing heavy — have to lying 14th — Lay at 12 P.M. just in sight at sunset Wind gale bearing S by E Dist 20 miles —

Saturday Nov. 21th 1868

Came in with a gale of wind from N.W. and
thick rain and foggy weather - nothing in
sight - Ship lying to heading up N.W.
under lower main topsails - the blowing
and raining all day - Being unable to
work our rudder well - steering with cables
and not being able to get the rudder up
or down deem it prudent to keep well
out from the land - This a.m. fitted
and put on the new steering apparatus
- at night still blowing a gale - wind
hauling gradually to the N.W.

Sunday Nov. 22nd

Came in with a gale of wind from the N.W.
and thick rainy weather - Ship steering S.W.
by S for Pajul with all prudent sail out
Saw the island of Graciosa bearing E
S.E. per compass - at 10 raised the
Sails of St. George, bearing S.E. - at
11 saw Pajul and Lion Ship steering
up for Pajul with the view of getting the man
that was left on shore last who we supposed
had deserted - at 2 wind hauled
out ahead and dying away nearly calm
at 3 finding we could not work up the
wind being light and a very heavy swell set
ting us in toward Pico deemed it prudent for
the safety of ship and lives to put away

keeping the ship off shore between Pico and St. George
all day - first of night passed in the

Monday Nov. 23rd 1868

Comes in, with strong breezes from E. S. E.
and overcast and foggy - Ship working up
the passage of Ayak - at 9 A.M. went on
shore in order to report the deserted
remainder of the day thick and foggy

Tuesday Nov. 24th 1868

Comes in, with strong gales from the
W. S. W. and foggy weather - Ship cru-
- ing off Ayak - left on shore at
8 A.M. raised a school of large sperm
whales going very slow W. S. W.
cleared away the boats and went down
Haist boat got nearly on when the
whale went down and then saw the
boat under water - whale came to
windward - went under the mate but
was too far up to fasten. Boatmen
having started - at 4 P.M.
lowered again for the same whales
they working up for the W. end of Ayak
but blowing heavy did nothing

Saw Sperm Whales
about 11 A.M. all boats to fire

Wednesday Nov. 25th

Comes in with strong gales from W
S.W. and squally weather - ship cruis-
ing off to the N of Fayal - at 9
P.M. saw sperm Whales blowing
heavy could not get up to them to
lower - in P.M. working up for the
passage - all night off and on

Thursday Nov. 26th

Comes in with strong gales from the S.
and squally weather - ship lying off
and on in the passage - at night
went on board - The ft. ship off to
the north and hove to some three
miles from the north head.

Friday Nov. 27th

Comes in with strong breezes from the
S. ship to cruising to the N. of
Fayal. - Saw Ship Com. Morris and
a hermaphrodite Brig working up for
the passage - saw one sail come out
steering to the W. suppose it to be
the Portuguese Brig Julia on a cruise
whaling - at sundown blowing
quite heavy - nothing in sight but
the different islands.

Saturday Nov. 28th 1818

Comes in with strong breezes from S.W. and coarse rainy weather. Ship under easy sail off to the N. of Fagal. Saw one steamer working up for Fagal. Nothing more in sight all day.

Sunday Nov. 29th

Comes in with strong breezes from the N.W. and thick hazy weather. Ship working up for the passage of Fagal in afternoon quite moderate and quite clear. At 4 P.M. went on shore at Fagal.

Monday Nov. 30th

Comes in with moderate breezes from the S.W. Ship lying off and on for the night. At 12 came on board - made sail and kept ship off down south side of Pico for the Island of Teneriffe of the Canaries. At night strong breezes from the S.W.

Tuesday Nov. Dec. 1st

All these 24 hours fresh breezes from the S.W. and hazy weather. Ship steering S.E. per compass.

Wednesday Dec, 2nd 1868
Comes in with fresh breezes from the N.E. and haze weather looking like rain - ship steering S. of E. per compass with all sail on for St. John Island of St. Vincent - Nothing in sight all day. at night rainy weather.

Thursday Dec, 3rd
Comes in with moderate breezes from the N.E. and overcast with some fog and mist - ship steering S. of E. with all sail on but foretop gall sail - at 8 P.M. saw one sail steering to the N. nothing more in sight all day - no fairweather Blackfish - birds or anything of the kind.
Lat at Merid 33 26
Long by Chron 21.10

Thursday Dec 10th 1868

Came in with light building air
from the S and W and very thick weather
smoke - not being able to see more
than 1/2 to 1 mile - all the
forenoon nearly calm. at 2 P.M.
took a light breeze from S.W. still
thick with smoke. - in the P.M.
steering south per compass - N.E. end
of Isle of St. Kitts bearing south per
compass. Dist 35 miles - at 6 P.M.
luffed to the wind heading E. N.E. with
mainsail aback.

Lat at Merid 29° 20'
Long by Chron. 163° 32'

Friday Dec 11th

Came in with light air (cats paws)
and calms. - all the night
calm. Saw a light as from a light
House - revolving - at 6 A.M. saw
the land - N.E. end of St. Kitts
bearing S per compass Dist 20
miles - There being a revolving light
on the N.E. extremity of the Island
all A.M. heading in - at 3 P.M.
quite a little breeze springing up
went abreast the Light House. - at
5 opened the town of St. Kitts.
3 sail in sight at 6 have too dark

Saturday Dec. 12th 1868
Came in with light baffling air from
all parts of the compass, — all night
staying off and on, in the morning
stayed working up — at 10 Took a
pilot being some three miles from
the anchorage, at 11 $\frac{1}{2}$ came to
an anchor in 24 fathoms of water
with barbs anchor. Gave her 60
fathoms of chain — in the P. M.
getting water ready for filling —

Sunday Dec. 13th
Came in with light air and pleas-
ant weather. — Stayed on light —
The Starb. watch for one day.
at sundown part came on board
again — One sail under French
colors came in and came to an anchor
at 8 P. M. Starb. watch went on
shore on liberty

Monday Dec. 14th 1868
Came in with fine weather with light
airs from the N.W. — being at anchor
at Santa Cruz, Island of Tenerife
at 8 A.M. all crew on board and
at work, getting off water — stores
for ballast, &c

Tuesday Dec. 15th 1868
Came in with light airs and calms
and fine weather. — Ship still at
anchor at Sta Cruz, Tenerife
— all hands employed in getting off
water &c

Wednesday Dec. 16th
Came in with moderate breezes from
the E. and a heavy swell from the
S.E. — at 8 P.M. ballast water
went on shore on liberty — remain-
der of crew stow hold — taking on board
ballast &c — One sail a man of
war steamer from Spain came
in and anchored today, — weather
thick and smoky —

Thursday Dec, 17th 1868

Came in with moderate breezes for
the at and fine pleasant weather
One watch on liberty the other
taking in ballast - Sprainting ship &c

Friday Dec, 18th

Came in with fine pleasant weather
calms and light ebb tides. from all
quarters - Starb watch's liberty
being up this morning a part came on
board by sunrise at the appointed time
remaining on shore at 8 A.M. when the
Starb watch went on shore ~~very~~ ^{very} hard
Snow, Ketchen Delano boatswains - Ted with
Delano Cook and Benja Graham
Commander Barrett hands
doing little or nothing on board as account
of not having men to carry on work
went on shore and tried to hire men
from shore to come on board and paint
ship after much trouble and expense
for boat hire and quids was not able
to obtain any one preferring this to
using extreme measures but not being
able to obtain help reported the above
men to the English Consul stating &
wished to have them on board to work

Snow - Delano and Cook

Refuse to come on board

at 4 P.M. — Hammond went quickly on
board and at work, and at 5 Delano, Snow
and the book, was taken to the Police, and
not using much on board was to the orders of
the English Consul put into the lockup
until the next day. — The Police, brings
no report from Graham

Saturday — Dec. 19th

Comes in with light air and fine
calm weather. At sunrise according
to orders. Start, watch but one man
B. Bill — all came on board — at 8
B. Bill, came on board. — Getting
ready for sea, — light air, calm
the P.M. and fine weather, — at 1 P.M.
Mr. have up short, all ready for sea
at 3 P.M. the Police took the men
Snow, Delano and took from the lock
up and carried them on board. No
report from Graham. Rechartered him
as a deserter to the English Consul, and
obtained a certificate from him to that effect
soon after sunset Capt. came on board —
made all sail. — Took anchor and stood
out to the south and east with
light air and calm. — at 10 P.M.
took the N.E. trades — steered S.S.W.

Graham Deserts

Sundays Dec. 20th 1868
comes in with light steady trades from
N.E. and fine weather. Ship steering
at N.W. per compass with all sail out
the islands of Teneriffe and Canary plain
in sight at 12 M. - Teneriffe bearing
N. and Canary N.E. per compass being
80 and 60 miles distant respectively.
at sunset wind freshening. nothing
more in sight all day.

Monday, Dec. 21st
comes in with light N.E. trades and
fine weather. Ship by the compass
at W by S. and S.W. at 8 P.M.
saw blackish going quick to the N.E.
water rather green all day - in the
P.M. saw porpoises - nothing more in
sight all day. Lat at Merid 25.04

the S. at 11 all sail on the ship
at 4 P.M. raised the light house on
Bermuda - also at the same time saw land
bearing N.W. - Lat at 4 32 00 Long 65.02

Wednesday Feb. 3rd 1869
at daylight saw the land - ship
standing in for the Light House being
about 10 miles distant - at 8 took
a Pilot - ship about 4 miles from
Light House - made all sail and
stood to the E - in order to round
the E end for Hamilton - at
4 P.M. came to an anchor off
Hamilton in 7 fathoms of water with
25 fathoms of chain to barb anchor.

Thursday Feb. 4th 1869
all this day fresh breezes from the S.
and clear weather all hands employed
in breaking out and coopersing oil ready
for shipping - at night a part
of the crew went on shore for a
run, with strict orders to be on
board in early morning and ready for
work

Friday Feb. 5th 1869
Fresh breezes from the South and good
weather Frank Chuz and Manuel
Cardaza absent from the ship without
leave at 10 A.M. was found by
the Police at the Police court where
they entered a complaint against me for

assault on Ship board which was
proved against me and was fined 20 shillings
and costs of court which was 20 shillings
more, It being better to submit to this
loss than a greater one by calling away from
the ships work the ships officers as witnesses
to defend the suit - Mr. Sylvius 2^d mate
and Doty a seaman was however called as wit-
nesses by Frank Liza - Employed in
breaking out and coopering aib ready for
shipping - at night a part of crew on shore.

Saturday Feb. 6th 1869
Fresh breezes from the W. and cloudy
weather - all crew on board em-
ployed in setting up shooks &c Took
on board 20 Bbls of P. potatoes - a lot
of Toggle Trans - 3 Boxes Bomb Lances &c
all from store of Mr. J. S. Darrell Esq.
- being sent in his care for Bk. Ocean
Steed. - Cook went on shore to the Dr.
to be doctored for the venereal disease.

Sunday Feb. 7th 1869
Fresh breezes from the W. with fine
weather - a part of the crew on shore
for a run - The remainder on board en-
joying the Sabbath - Nothing worthy
of note taking place this day.

Monday Feb. 8th 1869

Light air and calms all hands on board but Cook. — crew doing ordinary duty

In the P.M. mate went on shore and did not return again — at night —

On going on board found that some one had been taking tobacco from my room, made enquiries of Theward, and he stated that the 3rd

mate had given him 10 lbs. He had asked for 2 or 3 lbs by the mate and I answered that I would give it to him

This though was some three or four days before

Tuesday Feb. 9th 1869

Light air and calms with good weather Went on board this morning and hauled the ship up to the dock alongside of the schooner George Brown and commenced

discharging oil on board of her — The mate absent from ship not yet coming on board. Took the log book on shore for

reference and found that it had not been written up for three days. — The mate on shore and unfit for duty, being drunk and absent without leave

Wednesday Feb. 10th 1869

Strong breezes from the S and W and fine weather. Two men Frank Suza and Manuel Cordoza missing — have no doubt deserted — made a report of them to the Police Magistrate. The Mate absent from ship — discharging oil very slowly — a part of the crew appearing almost in a state of open mutiny.

Thursday Feb. 11th 1869

Strong breezes from the W. and fine weather. This morn. found that three more men were absent from the ship and they too no doubt had deserted — their names are as follows. — Joe Sylvia — Antonio — Ventura and Manuel Marchado — No report from those that went yesterday. — Found that more tobacco had been stolen from my room. judging that from 25 to 45 lbs had been taken altogether. — locked my room door to prevent further mischief — at 6 P.M. the mate came on board, but not fit for duty. — Discharging oil very slowly — Steward absent from ship nearly all day, Snow and Delano a part of the day also without leave.

Friday Feb. 12th 1869

Strong breeze from S.W. and fine weather
employed in putting oil on board Schooner
George Brown. The mate unable

to attend to duty today - is bad with the
Siberian tremor - None of the five ab-
-sentees yet returning to the ship - Some

of the crew in almost a mutinous state
the Steward and three boatsteerers Henry
Snow - Reuben Delano and Elisha Williams
being on shore and away from their duty
more than ^{or about} one half of the time - The

Steward threatened to make all the trouble
he can for me unless discharged from the
ship - At 2 P.M. the mate went on

shore again - he not being able to do
anything but very troublesome and in the
way - Steward absent from the ship nearly
all day. Snow and Delano left the

ship again without leave at 3 1/2 P.M.

finished discharging oil - Took on board
4 casks of coal and 4 Bbls of sand - hauled
the ship off from the dock into the stream
and anchored with barbed anchor in 5
fathoms of water and a scope of 25 fathoms
of chain - The amount of oil

shipped 56 casks equal to 384 Bbls.
Steward returned on Board at 3 P.M.

Saturday Feb. 13th 1869

All day fine weather - ship lying in the stream. The crew remaining on board employed in various duties about ship - no report of the five deserters yet. - Snow and Delano returned on board between 10 and 11 A.M., being absent since 3 1/2 yesterday P.M. - Cook still on shore on the Dr's hands

Sunday Feb. 14th 1869

Light baffling airs from the E and the S.E. and hazy weather - a portion of the crew had the privilege of going on shore for a run. - The mate still absent from the ship - at 5 P.M. the mate came on board - at 11 P.M. all on board but the ~~mate~~ and Cook and the 5 deserters - nothing having been heard from them as yet

Monday Feb. 15th 1869

Moderate breezes from the south and fine weather - employed in setting up shooks getting on Board fresh water and doing other duties about ship. The mate unable to attend to duty - at 11 1/2 the Steward left the ship without leave and did not return until 6 P.M. Cook came on board today. The Dr. deciding that he was well enough to do so have heard nothing of the 5 deserters as yet.

Tuesday Feb. 16th 1869

Strong gales and moderate weather with showers of rain - employed in stowing water - filling and taking water on board and doing other duty about ship - made complaint against the Steward for stealing tobacco before the Police magistrate - The Steward was taken up but waived examination. The mate Mr. Gifford, Mr. Borden the 3rd mate and Mr. Hammond was taken up and examined as witnesses - also the Clerk of Saml. J. White Grocer was examined he having bought some 22 lbs of tobacco from the Steward - a certain Mrs. Oddy was also examined - Court adjourned until tomorrow at 10 o'clock - Steward was ordered on board but did not go there up to 7 1/2 P.M.

Wednesday Feb. 17th 1869,
Strong gales and hazy weather
crew employed on board in filling water
and doing other duty about ship - all
on board but the 5 deserters and the
Steward he not coming on board
since yesterday - did not know of his
whereabouts - at 10 went up to
Police Court, - remained until past
12 M. - Steward did not make his
appearance and was not to be heard
from up to the above time - I was
at liberty to leave - conviction of
the Steward being suspended by the Court
and by the decision of the same the
Steward forfeiting all wages due him
after paying the value of Tobacco stolen
and the costs of Court.
up to 8 P. M. Steward had not
been on board
No report yet from the 5 deserters

Thursday Feb. 18th 1869

Came in with strong breezes from the W and W.S.W. and hazy weather with rain. employed in various duties about ship. — George Lanerhaff the Steward was discharged from the ship articles by the Shipping Master there being a complete forfeiture of all wages on account of embezzlement of Tobacco and also of desertion. — The said Steward being absent from the ship more than the 48 hours previous to his discharge.

The Cook also was discharged by the Shipping Master as per agreement paying him in full for all wages due him as per customary mode of settling at this Port. — Full amount due said Charles Delano after all expenses and charges paid on his account and his indebtedness to the ship and Owners being only \$6.32 cts. —

Paid said Charles Delano per order of Reuben Delano \$25.00

No report yet from the 5 deserters

Friday Feb. 19th 1869

Came in with light air from the S.W. and S. with fine weather - crew employed in various duties about ship - such as filling - taking on board, and stowing water - taking on board chains for ballast &c making preparations for sea

3 men went on board from the shore with the view of shipping have heard nothing from either the steward or the five deserters. - The mate attending duty for the first time since Feb. 8th

Saturday Feb. 20th 1869

Came in with strong breezes from S.W. and S with hazy weather crew employed in stowing water - ballast and doing other duties on board ship

Shipped five men today their names as follows Bermar ^{adv. \$2} Cino - Perez - John, ^{adv. \$3} Goncalves - Cezar ^{adv. \$3} Martez - Joaquin ^{adv. \$3} Rodrigue and Joao Francisco ^{adv. \$5}

all to be on board Monday morning by 7 o'clock - No report from the five deserters. - Pursuant to the request of the shipping master, and the consent of the steward I delivered him his clothes then shipped - to be on board Monday morn at 6

Sunday Feb. 21st 1869
Came in with light air and calm
crew on board enjoying the sabbath
a portion of them came on shore for
a run - Nothing worthy of note
Taking place today

Monday Feb. 22nd 1869
Came in with light air and calm
crew employed in filling - getting off
and stowing water & doing other duty
about ship. 2nd mate complain-
ing of the mate as being drunk and
quarrelsome - finding fault with
him. The 2nd mate for superintending
work. - Mate came on shore this
P.M. and remained nearly all the
P.M. leaving no officer on board
being unfit for duty. - but went
on board at 4 P.M.

Shipped another man today by the name
of Antonio Manuel at the 11th lay
being the same as those shipped Saturday
20th and is to be on board tomorrow
A.M. at 6 those shipped Saturday 20th
all on board this morn and at work

Tuesday Feb. 23⁹¹

Leaves in with light breezes from
the S.W. and thick weather - em-
ployed in getting ready for sea
at 2 P.M. Pilot went on board
to get underweigh - at 6 came
on shore again complaining that
the mate and nearly all hands was
drunk - that he found that the
mate refused to get underweigh
and resisted the Pilot's authority. - after
some quarreling the mate went below
to his room - and then he induced
the crew to take the anchor - haul
out a distance of half a mile or so and
tied her up to a buoy - for the night

Pilot came on shore

Shipped today two more men by
themselves the names of Wm Henry & 1/70 lay
\$10.80 advance and J. Hoyt & 1/60 lay
no advance. both to be on board
at 6 tomorrow morning

Wednesday Feb. 24th 1869

This morning strong breezes from the W. & N.W. and heavy weather. Ship lying at the lower end of the harbor of Hamilton. During the night Cooper and two boatmen of New Orleans and a seaman, Mr. Hammond went on shore without leave. At 9 Pilot came on board drunk. a seaman by the name of Hoyt also came on board with him. At 10 Cooper and Snow and Delano returned to ship. Mr. Hammond not returning. At 7 P.M. Pilot called all hands to get under weigh. Mate and boatmen. Pilot reports drunk and would do nothing. Pilot came on shore at 8 P.M. in the mean time the line started from the lower end and let go port anchor to keep vessel from going on the rocks. Went for the mate to come on shore - did not come waited for an hour or two he did not come - went on board and found him nearly drunk. He came on shore at 3 P.M. and was discharged for drunkenness - advancing him \$100 back in gold and paying him by order on Lawrence Peirce Esq. of New Bedford. I shipped a man for Steward by the name of Samuel Percha to be on board tomorrow morning at 1 o'clock.

The mate of the vessel and discharged

Promoted Mr. Julia from 2nd to
1st mate giving him the 11/18 but
also promoted Mr. Samuel E. Borden from
3rd to 2nd mate giving him the 11/20 th
low. Mr. Henry met appearing on
board today. The mate Mr. Gifford being
discharged brought his things on shore.
at 12 M. Mr. Hammond was arrested by
the Police and put in the lock up. He
was arrested some 4 or 5 miles out of the place.

Thursday Feb. 25th 1864
Came in with strong breezes and squally
weather winds from N.E. at 10 AM.
made complaint against Mr. Hammond
seaman that yesterday deserted the
complaint was sustained before the
Police, Magistrate and Mr. Hammond
was fined and costs of court Total
£1. 7. 4 1/2 = \$6.57 besides working a for-
feiture of all wages and money due him
from ship. I shipped as peremptory protection
book, Seamen &c. Manuel Joseph - ad-
vancing him \$18. at 8 AM.
Pilot on board took the ship some four
miles down the bar and anchored again
at 3 Manuel Joseph - Mr. Hammond
and Manuel Presura went on board.
at sunset rainy weather

Tuesday March 2nd 1869

Comes in with strong gales from the
W. & N.W. and squally weather. Ship
by the wind heading to the S.W.
Under lower topsails — at 10 more
moderate set courses and jibb at 12
M. set whole topsails maintopgott
sail and flying jibb. Ship working
to the W. with all sail out. — Two
sails in sight both steering to the
N and E. — Steward Bill sick
Hammond acting as steward. — at
sunset wind light and baffling
— Today have all the men that wished
clothes as also Boots and shoes.

the P.M. in the evening hazy
— nothing more in sight
— Lat at Merid 34.04
Long by Chron 49.43

Tuesday Mar 4th 1869

Begins with strong breezes from the W
NW and cloudy weather, but quite good as
in ship. To the W to the N and N
E. W. with all prudent sail out. - Saw
one sail working to the W. - nothing
more in sight all day. Water blue and
clear and but little Gulf Weed

Lat at merid, 35.08
Long by Chron, 48.48

Wednesday Mar 5th 1869

Begins with a gale of wind from the NW
and cloudy weather and poor seeing - Ship by
the wind to the N and N. E. W. with all
prudent sail out. - Water changing to
a greenish hue - saw several long tailed
birds and many Forbushes, many of which
also one sail steering to the S. E. and
one working to the W. - nothing more
in sight all day

Lat at Merid 36 27
Long by Chron, 50.48

Thursday May 6th 1869

Begins with a gale of wind from the N.W. and squally weather. Ship by the wind heading up & under lower, main-topmast and foretopmast and mizzen-top-sails — all O.M., water quite green, saw several flocks of longtailed birds, and many Portuguese man of war both large and small. In the P.M. water quite blue — at night blowing as gale with a heavy sea running from the N.W. — Took up books and made arrangements for a blower.

Lat at Merd 39° 10'
Long by Chron 49° 49'

Friday May 7th 1869

Begins with strong gales from the N.W. and cloudy weather with some squalls of rain. Ship by the N.W. to the N. with whole-topmasts on. — Saw one sail steering to the E.S.E. — Saw also several flocks of birds — in the A.M. water quite green — in P.M. quite blue at sunset more moderate — standing to the E.S.E.

Air — 63
Water — 65

Barom, 29 to 30

Saturday Nov 8th 1869

Comes in with calm weather and clouds
several birds around the ship — water
in the cove somewhat green — with tallow
drops and Portuguese man of war. Both and large
and small — at 12 M saw a school
of Blackfish — also saw white water caused
by a Humpback — at 1 P M lowered
all three boats and chased the Humpback
but ran into a school of Blackfish, and
struck 6 two to each boat, and saved only
two one to each of Starb, and Waist Boat.
Saw two finbacks going to the S.

Lat at merid, $37^{\circ} 56'$

Barom, 29.8.ths and falling

Long by Chron, 51.05

Sunday Nov 9th 1869

Begins with strong breezes from the N.W. and
cloudy weather but good seeing ship
cruising with all sail set to the S. the
water blue and clear — no birds
and only a few Portuguese man of war
— Saw one sail steering E. S. E.
at 12 M steered at her compass till 2
P M then steered S. E. and in the wind
that hauls to the S. — at 3 P M
saw two Sulfur Bottoms — water of
a dark green with considerable man
of war

Lat at merid $38^{\circ} 16'$

P B

Friday May 28th 1864

Comes in with light air from the S. and thick foggy weather - all night light air and veins of sun - occasionally lighting up through the P.M. - ship by the wind with all sail out steering for Flores saw several sail in the P.M. all steering E. & N.E. - In the P.M. more clear. at 2 saw the Isle of Larva bearing S. 60° E. 12 per compass Dist 25 miles at 3 saw Flores - much light - In P.M. water blue and clear In P.M. water rather green with some Man of War. Lat at Merid 40° 00' Long. 4° 40' 10' P.D.

Saturday May 29th 1864

Comes in with light & buffing air from the N and W. Ship off Flores went on shore and obtained 76 Bush. of P. potatoes 1 small buttock and a few eggs &c and got all on board at sundown - paid for the prof. potatoes &c in Black fish oil - oil at 75 c. per gal. at night kept ship off for Nagai,

Sunday Mar 20th 1864
Comes in with light air and calm
and fine pleasant weather Ship remain
ed under the lee of Flores — at 2 am
took a breeze from the S.W. — ship
steering for Sagal — at 10 am, lost
sight of Flores, and at 2 P.M. raised
Sagal, — working down for the S
side all night wind freshening to the S and
E.

Monday Mar 21st 1864
Comes in with light air and fine weather
from the S.E. and fine pleasant
weather Ship off the W end of Sagal
trying to work up for the S passage
but with a head wind and strong
current against us kept ship off to
the N. — at 10 A.M. left
the ship with a boat's crew for the
shore — Saw two sail a bark
standing in on the South side of
the island and a whaling schooner
to the leeward — at 2 1/2 P.M.
boat arrived on shore — kept remain
ed and at night sent the boat
on board again So back with
light air and fine pleasant weather

Tuesday June 1st 1864

Came in with light baffling air
from the S. and fine pleasant
weather. Ship working up the passage
from the V at Aguila. At Aguila
B.R. & Henry Strazier - Caswell, E.V.B.
14 months out, 2350 lbs. sperm oil
obtained 100 cabbages. 4000 onions from
the shore and other recruits - at night
went on board and worked up to the shore
for the purpose of going to Pico for a
3rd mate. - all night light baff-
ling air

Wednesday June 2nd 1864

Came in with light baffling winds
from the S. and fine pleasant weather
Ship working down the South side of
Pico for a landing place called San-
Juan to obtain a man for 3rd mate
at 1 P.M. left the ship for the
shore and landed at 4. saw and
agreed with Manuel Sylvia to go as
3rd mate and ship keeper. To
go on board in the P.M. tomorrow
all night fine and on with
light baffling winds and fine weather

Thursday June 3rd 1869
Came in with light baffling winds
from the N.W. and fine weather
Chief cruising of San Juan waiting
for Frank Silva. Saw plenty
of porpoises. at 2 P.M. saw two
Humpbacks - lowered and chased them
with two boats. Followed them in
up to the breakers - at 4 P.M.
boat went in for Frank Silva
He came on board at sunset with
his clothes - made agreement with
him to go for the season for the 1/42 bag
- advanced him cash \$40⁸⁰ and 1 Box
Tobacco 122 lbs @ 40 c - 48.80 c
all night light baffling winds and
squally weather

Friday June 4th
Came in with moderate breezes
from the N.W. and S.W. and somewhat
hazy weather. Chief steering
off to the S and E with all
sail out. Saw plenty por-
poises and two or three humpbacks
- bombed one - he went down
and we saw him no more
at sunset off W end of Perceira
- wind out to the S. and
cloudy weather

Saturday June 5th

Comes in with light baffling winds from the N.W. S.W. and cloudy weather. Ship steering N.E. by N. with all sail out for the Morris around. Saw in the P.M. plenty of porpoises and several birds - also a few Scaup. - water blue and clear - several finbacks in sight

Lat at Merd. 39° 30'
Long. to Leiro, 27° 31'

from the W., and rainy weather
Ship by the wind heading to the
W. S. W. — nothing in sight
at 12 M. Tacked Ship stand-
ing to the S. E., it being nearly
calm, with moderate breezes
and thick weather
C. S. Obs,

Thursday, Sept. 30th 1869
Came in with fresh gales from N.E.
and cloudy weather. at daylight in
the morning saw ship Com. Morris
maneuvering for whales. and soon after
saw her boats down and at 6^h saw
the whales — made sail and stood
up for the Com. she being to
the windward found the whales com-
ing to the leeward quite quick — saw
one of the Com. boats fasten.
at 7^h lowered all three of our boats
and soon after the larb. boat struck.
The whale run to windward bad
and did not kill him until near-
ly 12 — The other boats tried
but could not strike again
saw a large school of 50 or
60 Blk. whales — Com. Morris
took one or two — saw her
cutting — Took our whale to
the ship and cut him in by 7^h
P. M. — The whale was large but
very poor — judge he will make
about 60 Blk.

BK Ocean Steer Mon 27th 1868
Sagres Pier, Esq.
New Bedford

Sir, Sir

is leaving us for Europe, I thought
you would like to hear from us, so I write.
We have had a great deal of bad weather
wind and rain. I have seen whale three
times when we could not lower.

Eight days out had our first fair day
and took our first whales (60 Rbls) have
taken six whales (120 Rbls)

I shall have here in a few days for
the Morris Ground. This Annual, where
I intend to land the oil to be shipped
to you. Tell Hawthorne that our Mr. M.
shaker broke down the first whale. One of
the supporting links broke at the forward
bridge and I have made it up with
one bridge. I shall get a link made at Falmouth.

One of the Mr. Knives we found to crumble
bad at first. I thought I should have to
condemn it but it does better after coming
down. otherwise the machine was as well.

I trust I may be able to give you a good
report of my officers and crew when I get
home. This parcel of oil 120 Rbls I leave
at Falmouth please I don't want Insurance, as we are
bound Falmouth to N. B. - My respects to Mr. M. and

We have one Mr. M. Knives
at Falmouth

161

Black Ocean Steed off Western Islands June 22nd 1868

Jacob B. Hadden Esq.

P. New Bedford

Dear Sir

Having the opportunity of disposing of my tobacco here have landed and sold it to Manuel Lawrence a merchant or trader at the Port of Ponta Delgada Island of Flores. There being no American or English residents at this place, Manuel Lawrence has filled out and signed my landing certificate. The U. S. Consul at Sta. Cruz has also subscribed his name to the same. He has no stamp or seal, but is authorized by the Deputy Consul at Sta. Cruz, the principle Port of the island.

Should any question arise in regard to the agent's authority reference must be made to the Deputy Consul at Sta. Cruz.

The certificate is written partly in Portuguese and partly in English but I trust you may be able to find it all out without much trouble.

Should any discrepancy arise in regard to mark or number please inform me immediately.

Yours Obedtly

J. B. Hadden

I. J. we are now bound for Hazel for the
purpose of landing our oil 250 Bbls I shall
then go on the Morris ground. It may be that
I shall miss it by doing so, and should not
had I less confidence in the place - We shall
be late and I shall not have long to remain
on the ground before I find out whether there is
any whales there or not, Should there be no
sight there my intention is to work to the west
again as soon as possible. I have obtained
my potatoes and can remain out until Nov,
or Dec, should I do much to the north

shall probably touch here at Hazel before
going west, I have seen but one whale
since leaving home - and that was the Bk
Concordia of Sag Harbor Capt Dunbar 100 Bbls
Sperm - We took in 60 one whale 110 Bbls

we raised the whales going to windward
the being to the windward of truck and we
helped kill him, Had bad weather
in the Gulf - saw whales several times
when we could not lower - the vessel can
be too good for cruising in the Gulf stream

I trust all is right about the tobacco

My respects to Mr. Peirce - Be
sure and answer this in time to meet me
at Hazel in Sept

Please find certificate
within and acknowledge
receipt thereof

And Sir Oblige
Truly and Fraternaly yours
G. J. J. J.
G. J. J. J.

Noyal June 27th 1868

Lorenzo Peirce Esq
New Bedford

Dr Sir

I have shipped
to now to be landed at Boston for Park
Fredonia Co. Burke - 41 casks containing
8952 Gals. of Steam Oil - 284 Bbls. at the
rate of one dollar and twenty five cents in gold
per barrel. There will also be a charge of twenty
cents per barrel for commissions &c.

Please find enclosed and acknowledge receipt of
list of names

I leave today for the Morris Ground and
may be here again in Sept. and may not until
Nov. or Dec. - Should I get 3 or 4 hundred on
the Morris ground shall be here in Sept. if not
shall go West and remain as long as possible
and not be here until Dec. - Have for-
warded to you Mr. Hadley Landing Certificate
in duplicate of No 1000 landed at N. York.
My regards to Mr. H. and Sir Oblige
Yours
L B Borden

Br Ocean Steed Sept 4th 1868
 Lorenzo Teirre Esq.
 New Bedford

Dr, Sir I have met with
 an accident in the breaking of my steering apparatus
 by a sperm whale in his attemptation to bite the rudder
 The whale however was dead - We had two of them
 alongside and was cutting - the weather very rough - one
 of the whales got hold of the rudder and before we
 was aware of it the apparatus was broke I have no
 one to blame, it was pure unseen the pieces broke
 and the ones I wish for you to send out to me - are -
 we will suppose the apparatus to be placed on the rudder
 head - first the starboard plate in which and
 through which the shaft or screw works - being
 fifteen inches long on the shaft or screw and contain-
 ing eight threads - Second the after end frame piece
 (one of those that has rubbers on them) being also fifteen inches
 long when complete with rubbers and ends.

Third - one of the bed pieces (being a plain
 casting) in which the after end frame piece rests
 and being also fifteen inches between the uprights
 It is Reed's Patent No. 1917 and I believe
 a 12 in John W. Howland I think will under-
 stand the size as also the pieces I want

I shall be at Faval about the mid-
 of Nov. and shall look for those pieces by the Fre-
 donia, as she will be due at Faval about that time
 Until then I shall try to get along with

tanks - It is doubtful whether I can get the
apparatus repaired at Anvik - We have just
arrived on the ground from the E. - on the 27th Aug,
fell in with the first whales and took two 100 Blbs
but owing to bad weather and very warm we saved
only 150 Blbs from the two - Giving us all told
440 Blbs Unless weather compels us to leave

we anticipate a good seasons catch - Are in the
Gulf Stream and shall try to hang on as long as
possible - We are all very proud of our boats
the last from Beethles "cant the heat," I am
much pleased with the one from Butlers - but
the one from Driffts does not suit the mate and
I have given him the one from Beethles and I
have taken Butlers. I cannot condemn Driffts

There is as much in sailing or managing as
there is in the boat generally

I am sure we have saved several whales
extra by superior sailing boats

My regards to Mr. Hadley

And Sir Oblige

Yours respectfully
L. B. Borden

BK Ocean Steed Oct 6th 1868

Lorenzo Perce Esq
New Bedford

Dr Sir The addition
is now bound home - The ship to now
has her five casks of Spinn Oil 238 240
238 238 302 - 1381 Gals. - 43 Bbls
26 1/2 Gals. - all marked Ocean Steed
I have received from Capt. Cornell
2 Boxes of Sugar - the weight and price
to be determined on and settled by you
I have also received from Capt.
Cornell 6 Boxes of Tobacco for sales -
rather than for him to throw it overboard
I shall remain here as long as I pos-
sible can - we are here in rough
weather but we find whales
expected to be at Vinal about the
mid of Nov. - I have all told
520 Bbls. - In respects to Mr.
Hadley and Sir Oblige
yours respectfully

P.S. I send Mr. Crofter to BK
Addison He is sick and unable
to do duty - He has no bill on
board

Yours &c
L.P.R.

Bk Ocean Steed Nov 9th 1868

Sorenzo Peirce Esqr
New Bedford

Dr Sir My last to you
from Bk Addison was written in great haste, I had
time to say but little as it was blowing a gale,
you must therefore excuse my very brief note and my
and all imperfections you may find in it. We are
now on our way to Fuzil, — left the Ocean Steed
ground on the 2^d inst, with you Bk's sperm all told,
I regretted leaving very much as we was sure of
seeing whales every day we could keep on the ground.

We had strong gales and strong currents to contend with
and being much out of water and crank and steering with
tobies we had hard work to keep up, — For the last
two weeks we had a gale about all the time and
being in the rifs we kept duncing about pretty much.
I have been ever so mad with you for not putting
in more ballast, — We are all out of water like a bas-
ted whale, and I intend to put in a lot of rocks at
the first place we anchor.

I have seen only three whalers since leaving home
The Concordia, The Addison and the Com, Morris
I spoke the Com, Morris three weeks ago with
250 sperm & 30 whale — Saw her cutting three days
after and on the 2^d inst, saw her boiling, she no
doubt will remain on the ground as long as possible
and will probably make up 500 before he leaves.

I had a vessel like the Addison or Com,
Morris

I should remain there all winter or as long as I could
in the spout of a whale. The whales are small but
fierce, and it requires a good ship with four or five
boats. Capt. Howland sends five boats into a
school! I have seen the need of four boats. Before
sailing I expected to cruise north for large whales
and then it does not make so much difference.

Our vessel did anything on the horn, Morris ground
but the Addison, — but no doubt there is whales
there, — Capt. Howland saw them several times but
got nothing — When I got there the season was
over and I left again for the Ocean & tried ground.

We have found one very ugly whale to deal with —
the cut of all our boats — he was as much smarter
than anything I ever saw before as a sperm whale is
superior to a bull dog — as soon as a boat got near him
he would go down, and unless the boat would pull
away as fast as possible he would have her in his jaws
the next minute. When he could not get hold of the
boat he would grab at a car or anything else at hand
— as our boat got disabled we would come on board, jacks
up with canvas, then off and try him again, — in this
way we kept working on him and he on us for about twelve
hours — In cutting up the third boat he got his death
wound and we hauled him alongside after dark — he
made us forty barrels of oil, — We have taken twenty
four whales altogether, — after our crew being sick I sent
him home for Addison. This left me rather lame,
as I am without a ship keeper, — I have remained
on board and kept the ship most of the time since, but I

Send a difference in the boat, working — I shall try
to make a ship keeper of one of the foremast hands
and go in the boat again, myself. The coopers mate
does very well as coofter.

Now I will tell you my wants — articles I want
now to send to Barbadoes in time to meet me there in
Feb. — First 50 Stagle irons those that the heads
shut inside of the shank — 25 — 3 Boxes of
Bomb Lances — 2 of small — 2 Boxes of large
1 do of small — If convenient and with-
out great expense 20 or 25 Bbls of potatoes — Can
get none at Barbadoes — Also if convenient I
want from Capt. Wm. Allen an abstract of his voyage
or a description of the ground where he got his oil in
the Stk Pacific on her last voyage. I also want
you to send me a small chart or plan, on a large scale
of the Barbados Banks and islands and of all the villos
reef — I some think of going down that way,
after leaving Barbadoes — commence down there in
the cruise up the Gulf through the summer or in
the Breen stood around in the fall. This is the
route I now propose but there is nothing certain about
it, for the prospect of a good cut at any time or place
will be a sufficient inducement for us to change the pro-
gramme. I am in hopes of getting one or two whales
about these islands before leaving — When I leave
the W. B. I expect to cruise about the Cape de Verde
until time to leave for Barbadoes.

Should any of our friends wish to know where we
take our oil you can tell them in the Gulf stream.

and if they wish to try it you can say that as soon as they get into the stream and find a blow coming on with the rain. They can look out for whales.

We use a great many irons with these small whales have had a great many to break after using them once or twice. But have not lost any whales by iron breaking — They break in skaitteing or in whales while towing or alongsides the ship —

— Capt. Howland makes the same complaint — I always use a new iron for a first head iron and don't intend for anything to get away from us after we once get harrowed — In regard to

bombs I would say that my officers are not so well skilled in their use as some officers I have seen — Should you hear of any good ground please inform me of the same, P.D.

And Sir Oblige

Yours with respect
G. B. Borden

Master Bk Ocean Steed

Faval Nov. 17th 1868
Jacob B. Hadley Esq.
New Bedford

Sir, Yours under date of
Oct 29th came duly at hand yesterday - and those
of June and Aug. on the 13th inst - Bills
of Lading of Shooks &c and of Steering Apparatus
has been duly received. I was quite
surprised to find there awaiting my arrival nearly
300 Bbls of Shooks - I must think that
we can make whales or do something big by
sending us out earlier within three months of our
sailing from home - I cannot ship my rig
from this place with any degree of certainty of
its being sent home until spring - I shall
therefore keep it on board until my arrival
at Bermuda unless I have a chance to ship it
previously - Could I have shipped here should
have put in a quantity of rocks for ballast and
cruised about these islands, and gone out where
Capt. Burke saw those whales to the W of
these islands - Now must go to the Bermudas
for water &c and then think of cruising about
the Cape of Verde and in at Hamilton Ile
of Bermuda in Feb. - you will therefore
please send my Greetings to Bobb Lances &c to
that place - If convenient and agreeable with
yourselves should like for you to advance to
John W. Howland as he requests a sum of

sums of money not exceeding \$1000 One Thousand
Dollars. Charging the same to my account
but taking his receipt for the same in account
against Bark Ocean Steed. Presuming he has
not drawn on you against said Bark,
Sperm Cat I see is up again to \$2 to \$2.15
May it be like old Tinner "always advancing,"
I sometimes like to look at a shipping List
and other C.B. papers. — My kindest regards
to Mr. Peirce — Thanks for past favors and
"may they be continued" and Oblige
Yours respectfully and faithfully
G. B. Borden

Mayal Nov. 19th 1868
Lorenzo Peirce Esq.
New Bedford

Sir I have drawn on
you a Bill or Draft of \$100^{in gold} One Hundred
Dollars 10 to days from sight in ~~favor~~ Payable
to the order of ~~W. Peirce~~ W. Peirce or order,

Please pay the same and charge the same
to the account of Bark Ocean Steed and

Sir Oblige

Yours respectfully
G. B. Borden

Master Bk, Ocean Steed,

Bk Ocean Steed Cruising off Azal Nov. 22/68
Lorenzo Peirce Esq.
New Bedford.

Sr, Sir

I came out of Azal last Thursday eve — One man having deserted I am obliged by law, to go back report him to the C. Consul and await 48 hours his arrest — Since coming out of Azal I have been trying to get back again but it has been blowing heavy all the time until this P.M. I have taken my shooks and steering apparatus on board. The steering apparatus fits well — I think the charges on those shooks at Azal rather steep — I will give you the items and then you can judge for yourself —

Lighterage of shooks in, \$3.10 — Lighterage of do out, \$3.10 — Transit duty & custom House for tons a/c of same, \$9.45 — Storage of same 62 Bbls 3 mos, \$6.20 — Brokerage entering and clearing &c \$3.00 — Cranche on shooks \$2.48 Total exclusive on shooks \$27.33 — Clearance \$9.54 — Custom House a/c \$6.50 — Custom House Guards, a/c \$1.85 — Transit duty and custom House officer to go board Fredonia for steering apparatus \$1.40 making a grand total of \$46.62. This added to freight \$6.20 give about \$107 in gold. Cost of transportation of shooks — add to the difference of gold and currency and we have nearly \$156 or 50 cts per bbl.

I have drawn on you a Draft of \$100

at this place — I did not intend to draw as
I had money on board. But coming on rough
weather and night could not get on board conveniently
— but after getting on board I found that one of my
men had deserted and am obliged to await for his
arrest. — I am of the opinion that the people
know how to charge for things at Nagai — especially
so when they get a man hard up or in distress. —
— all go in for just what they can make out of
him. — You will probably be able to judge
better of this when Capt. Honeywell's bills are
made public — On my last I wrote about ad-
vancing J. W. Howland a sum of money not to exceed
\$1000 on acc of his interest in with me in Bk of
Alfred. — I presume that he has not drawn
on you, should he have done so you will please
not exceed \$1000 — The weather about here is
very rough and the people think that winter has set
in in earnest, and I shall soon leave here and
go South. — The lower hold of my ship is nearly full
of oil and water, still I am very tight and crank
and can do scarcely nothing in holding on or working
to the windward in rough weather — She needs
40 tons more or less of pig iron in the bottom of
her hold — I did not deem it pru-
dent to land my oil here with no prospect
of shipping home until Spring and then at
a large expense — Though I was desirous of
taking my oil out in order to put in rocks

But I intend to go down to Teneriffe, soon
for water and shall then try to get in some
rocks — I have sold a part of my tobacco
could easily dispose of it, were the weather good so
I could get around the land — Tobacco seems
in good demand — Since writing my last
and informing you of my intention of going to
Hamilton Bermuda as my next port I have
heard that there is little or no water to be obtained
there and I may call at both Barbadoes
and Bermuda — please therefore, write me at Bar-
badoes informing me at which place you will
send the articles I requested — please in-
form me how the oil has turned out at home
if it holds out to the meager in full — we
thought that per Addison was about 10 per
cent above par — it might be regarded as that
came from the whale that cut up our boats
and caused us so much trouble

My kindest regards to Mr. Hadley reserving
a fair share for yourself — write often
and Sir Oblige
your most Obedt Servt,
G B Borden

4
Fayal Nov. 23th 1868
Jacob B. Hadley Esq.
New Bedford

Dr. Sir I forward
by Capt. Sake of Brig. J. W. Wiswell one
Chronometer obtained of James S. Kelly in
trial, and as per agreement to be returned
from these islands this fall - I retain
the other one price \$200.

Will Mr. Hadley be so kind as to see the
one sent home is returned to Mr. Kelly
taking his receipt for the same

I have been delayed here several days by
a man deserting - - - have now fulfilled
the requirements of the law made and provided
for such cases and today leave for a cruise
to the Canaries & Cape Verde - and intend
to be at Bermuda in the month of Feb.

The J. W. Wiswell sailed yesterday for N. Y.
direct with oil - and tomorrow the Freedom
sails for Boston with fruit - I regret I
could not ship my oil to either of these vessels
Both had cargoes engaged on my arrival -

I propose trying the Bahama Banks early
in the spring - Please send me all the infor-
mation you can obtain not forgetting that I
much regret that my vessel was so very
poorly - please write often - My kindest regards to Mr.
Peirce and all believe me your sincere friend and
well wisher
G. B. Borden

No 7

Br Green Street Liverpool Dec. 17th 1868

Lorenzo Perce Esq
New Bedford

Dear Sir I arrived here on the 12th inst from Agul. Have obtained my water and about 40 tons of pork for ballast and intend to sail Saturday the 19th inst for cruise to the Cape de Verde, and be with Hamilton Bermuda by the mid of Feb. I could have shipped my oil from this place direct to London at the rate of \$1.03 per barrel, but not knowing as such a proceeding would meet your views I concluded not to forward.

I have seen nothing since leaving Agul. I would not come to an anchor and remain at Agul on account (or one account) of there being so much short liquor on shore to be obtained by sailors but I believe I jumped down the span into the fire by coming here. But this is a much safer place for the ship and my men will not get often the chance for food.

I loose something here on Portuguese money, as I have at Agul that sort or is worth \$1.20 is worth but 95^{cts} here. There is no sale for tobacco here at this place. I have nothing to communicate

time in getting the ship in at the dock and
getting out oil he was not near the ship
and I fear I may be obliged to discharge
him for Policy's sake — I shall dis-
charge the cook — He obtained a bad
disease at Teneriffe and has not been able
to do much since — I shall be
obliged to draw on you but as yet can-
not say how much — I was in hopes that
I should get along with my tobacco with-
out drawing — but some of my crew have
made complaint against the ship for smug-
gling tobacco thinking to obtain a discharge
on the plea that they did not ship in a smug-
ger — There is no sale for it here and I
may be obliged to land it

I forward you Bill of Lading of oil
shipped by Schooner George Brown

Freight paid in Gold by Messrs Middle-
ton & Co at the rate of 40 £ in Gold per Bbl

I pay here on oil — also a charge of
45 £ per Bbl — This amount covers
all port charges — such as Tilotage — Water
&c Please inform me of its
safe arrival home.

My respects to Mr. Mordley and
Sir Oblige

Yours respectfully
G. B. Borden

Master Bk Ocean Stead

Hamilton Bermuda Feb. 20th 1869
Lorenzo Pierce Esq.
New Bedford

Dr. Sir

As the steamer
Fah Kee sails today for New York I
thought I would inform you of how
we are getting along - I have shipped
all my oil 387 Bbls by Schooner George
Brown as I have previously informed you
She sailed on the 13th inst but did
not get clear of the land until the 15th

My crew have caused me much trouble
here all the boatsteerers and steward bent
upon getting their discharge and have done
everything they could or dared do to obtain
it. The mate also has been very lax and
inattentive to his duties - and at one time

I felt inclined to discharge all that was dis-
satisfied Under Protest and come home
for another gang; they discharged parties
paying all expenses of obtaining another gang
as well as the charges occasioned by the deten-
tion of the vessel in port - after this man-
ner and no other would I discharge them

But these views not meeting their expecta-
tions all have excepting the steward re-
turned quietly to their duties again,

Steward the principal instigator of the

trouble finding himself deeply involved in difficulties deserted from the ship.

Their last attempt was to commit the ship ^{or master} for smuggling tobacco. In order to accomplish this they obtained a few pounds of each for use, then collected all in one parcel and sold or deposited it on shore representing that I given it to them to sell.

Learning of their intentions I refused them more. Then in order to make up the requisite number of pounds, the Stewards had to steal it —

The thing was proved against him and he was liable to a penalty of six years working upon Her Majesty's Roads —

Through intercession on his behalf conviction was suspended, but he forfeits all money's and wages due him from the ship — since that time I have not seen him —

I have discharged the Cook. He has been sick and off duty with the venereal, and on our arrival he went to a doctor on shore.

The doctors and board bills amount to quite a sum which I have paid charging him the same — have made a final settlement with him after the usual custom of this port, paying him in cash his just due and taking his receipt in full of all demands against said Cook.

Master and Owners, Not having enough
To pay his passage home I have ad-
-ced him \$25 on his brother's account as
per order. His brother having been
promoted as boatsteerer on the voyage.

The Cook comes home in Steamer
Fah Kee -

I have bought \$300 worth or have
paid out that amount for old chairs -
amount 12 Tons in all, composed
of pieces of all sizes and lengths - of but
little use except old Iron. I have one
however that is quite fair 1 1/8 in. of 90 fathoms.

I shall be obliged to draw on
you quite an amount in order to meet
my expenses here. Have paid out
quite a sum on account of my crew.

Shall try to get away from here on
Monday or Tuesday next. - Should I
find whales to the westward after leaving
here shall touch here again in June
for potatoes - Should I not find

whales shall work to the east and touch
at Pagan in July or Aug. - Then work
west again on the Ocean Fleet ground and
remain as late as possible and be at home
in early winter - This is my plan for the

present. but I know not what may take place
to cause a deviation - My kindest regards to

to Mr. Hadley - In haste etc I remain Yours Most respectfully
G.B. Borden

Hamilton Bermuda Feb. 22nd 1869
 Lorenzo Pearce Esq.
 New Bedford

Dear Sir

Again I seat myself to write you a few lines - I am now about ready for sea and intend to sail tomorrow. I have lost six men by desertion - Discharged and paid off the Cook - and have shipped six others and shall try to ship a steward tomorrow - I cannot make out much of the mate, he has not been fit for duty any part of the time since our arrival here - When remonstrated with - admits that he has done wrong and that all the trouble is caused by his negligence and promises to do better and never drink another drop - will keep rather straighter one day and the next is as drunk as ever again. He does not want to be discharged and oftentimes I get completely out of patience with him.

I draw on you to the amount of \$533 $\frac{20}{100}$ Five Hundred Fifty Five $\frac{20}{100}$ Dollars a 10 days - Rate of exchange ruling 105 per ct. at this place - Value received in cash recruits &c \$528 $\frac{76}{100}$ Five Hundred Twenty eight Dollars - Seventy six cents. Three Hundred of this amount I pay out for old chains - One Hundred Seventy

Four more as expenses on 387 Bbls of oil
shipped home per schooner George Brown

This is an expense I am obliged to pay here
of 45 cts per Bbl. exclusive of the 40 cts which
you pay at home. This 45 cts per Bbl
covers all expenses as Pilotage, - Fresh Water
Light dues Wharfage - Clearance and
all other Port charges. I take about
350 Bbls of Fresh Water and trust I have
enough to last me until Nov. at which
time I shall expect to be at home.

Hoping I may be as successful as the
past season I sir

remain yours most respectfully
H B Borden

Master Bk Ocean Steed. C. S.

Hamilton Bermuda Feb. 25th 1869
 Lorenzo Pearce Esq
 New Bedford

Dr Sir I have dis-
 charged the mate for drunkenness and
 neglect of duties - all along since
 our arrival here I have put up ^{with} in
 hopes that we should soon be at sea
 and then matters would be all right
 But it has been growing worse and worse
 all the time - Yesterday I was ready
 for sea - sent the Pilot on board to get
 the ship down the Bay - The mate ob-
 jected to getting underway and resisted the
 Pilot's orders for awhile - quarrelling
 with him and then went below and
 turned in drunk - The ship was not
 under weigh worked down about half of
 a mile and tied up to a buoy for the
 night and then the Pilot got drunk
 too, - In the morning blowing on, - lines
 parted and the anchor let go - Mate
 allowed or sent the men on shore for dinner
 in the night - In the next morn Pilot
 wished to get underway - Mate did not
 wish to and the men on a part of them
 would not - I went on board sent
 the Pilot on shore and requested the
 mate to come on shore for his discharge

as I thought this was most ^{too} much
that I discharged him at first should
have got clear of much trouble and ^{expense}
Intend of maintaining discipline he
has mingled with the crew and become
as one of them until he has lost all
respect for himself or then for him
Under the pretence of buying some trifling
things he has sent them on shore to get
and procure liquor on board for him and
then he would join in drinking it, giving
my the boatmen and men - counting
- praising them in their foolish proceeding
he seemed not to care so that he could get
get rum - so has matters proceeded
from bad to worse until I thought it
for the interest of the voyage for him to
be discharged - In the doing of which
I have no malicious feelings to be just
ified - In general as an officer and
whaleman I have no fault to find
although I have seen better and many
worse - He has now reduced himself
to such a state that I think it would
materially injure the voyage to keep him
on board the ship - I did not wish
to retain him all my officers as we had
done well and if anything should happen
that we did not do as well the coming

season it could not be laid to a charge
of officers — I have not acted hastily
or unadvisedly in this matter — Masters
and merchants know the trouble caused
by his drunkenness and man advised me
how and to discharge him — and not
until I felt satisfied in my own mind
that we had better be one officer short
than to have him did I consent or
forced to discharge him — I have
advanced here at various times about
140 Dollars in gold, giving him an
amount of his bill on board ship in
gold to which is to be added the us-
ual Dut, and Ins, &c I also give
him an order on you for Balance
due him of the Captain of BR Ocean
Steed. up to date — You will please
make all needful allowances for gold

I have promoted Mr Sylvia as mate
and Mr Borden as 2nd mate. — There is
but one man here that could be in-
duced to go as mate I know nothing
of his precedents individually — But
has the reputation among the people on
shore of being a tall whole man
He wants \$200 advance and the 16th
day I think this rather good ship
and shall try to get along with my present

Yours, — Thursday Feb. 25th 1849
I am now about leaving Ham-
ilton for a cruise to the West, and
on account of discharging the mate
am obliged to draw another draft of
on you to the amount of \$120 Dollars
in 10 days from sight — I trust I
may now be able to get to sea

My respects to Mr. Hadley and all
others interested in the Bark Brown & Steel.
And Sir Oblige

Yours Respectfully
G. B. Borden

Hamilton Bermuda Feb 7th 1869
Lorenzo Peirce Esq^r
New Bedford

Dr Sir I intend ship-
ping about 210 Bbls of Sperm Oil by the
Schooner George Brown of this place former-
ly a whaler of this Haven - It sails in
about a week from the present time,
Your kind letter of Jan. 18th was
adu. handed me by P. A. Barrell Esq^r
containing a/c of forwarding to me at this
place 20 Bbls potatoes 50 triple Prons -
3 Boxes Bomb Lances - &c all of which
has been duly received by me - The
potatoes comes in very acceptably as there
is no vegetables to be had here at this
season of the year - The George Brown
is bound to New York direct - I shall
keep the other oil 175 Bbls on Board as
the present prices does not warrant shipping
it being in the ground tier and not
liable to leak and to only ship in
order to make room for water. I have
a long season before me and do not
wish to leave the whaling ground for
water - The chart^r instructions is
just what I needed as also the abstracts
of Bk Pacific - The schooner George
of James Capt. Taber left here the day

before my arrival - bound to New Bedford
Direct - I could do no better in
shipping my oil than to ship per Geo.
Brown at 40 cts per Bbl payable in
New York - Pilotage is rather high
and will cost about \$36 water 50 cts
per 120 gallons I shall take about
250 Bbls on Board at this place
and think some of purchasing a couple
of cables for ballast I can get them
for about 1 1/4 cts per lb. but I do not
think of paying quite so much I think
this a good place for American ship
but no other port than an English port
for an English ship
My kindest regards to Mr. Hadley
and Mr. believe me ever
respectfully Yours
G. B. Border

As is not perfect

Bk Ocean Steed April 10th 1869
Lorenzo Peirce Esq
New Bedford

Dr Sir I do not know
as a line from me, now, will be, worth the postage
I have taken nothing since last fall, and seen nothing
in since leaving Pthual. No one would believe
it possible, to the, when we saw whales last fall, to
cruise over the grounds we have until this time,
without seeing 1 or 2. I cruised about
of March up to the 1st inst. on the Charleston
ground without seeing anything and am now work-
ing down to where P & saw whales last, seeing
P & saw last, heard of Rk Thayer's Boat to
Bermuda - he had cruised all winter on the Ches-
apeake - saw whales three times and took 50
Bbls. - The past winter has been a complete
failure with me, but I am in hopes
that we shall yet make up for last time.
Last season there was many whales seen be-
tween this ground of mine and the N & E - But
it is no guarantee to there being plenty of whales
on a spot or ground one season that they will be
there the next. Still we have no better cri-
terion to go by in providing for whales than to cruise
on those spots where we have known whales
to frequent, and as there is so many of those
spots here in the N & E Atlantic that when we
have cruised three or four weeks on one of them

and seen nothing. It is in my opinion time to
move for another and in this way I shall try
to keep moving about until I fall in with
whales and then I am in hopes of getting a set.

I should now make settlement with Mr.
Gillard. I would say that the oil instead
of the ship should have the port charges at
Bermuda and the 85 cts per bbl, & expense
in the oil — as cost of shipping includes
those charges. And as I anchored at Hazel
last before express on account of shipping oil
that charge also should be borne. As to oil
being about 20 cts per bbl, extra over
and above what was paid at home.

I feel injuried to learn how my last
shipment arrived home. Too much to think
it strange in me in consigning to Messrs. Middle-
ton & Co. instead of Shepley Direct to you.

I did so on account of his being in New-
York and would care for it on its arrival
in case that you had not timely notice.

I should now return to my wife that
mortgage you would confer a favor and
be greatly obliged.

Yours most respectfully
G. B. Borden

Bk Ocean Steed May 29th 1869
Lorenzo Peirce Esq
New Bedford,

Dear Sir

I did not think of writing again without having something to write about. But as we are about sailing at Nyal I know that you will expect a line from me and I am with regret must say obliged to report clean — In April I cruised up in the Gulf Stream where we saw whales a number of times last spring but saw nothing there. By the way I have seen a report that the Plot boat Hope on a cruise in April, got soundings in Lat. 41.25, Long 63.10 — in 49 fathoms, sandy bottom. This is just on the northern edge of my ground and I cruised all about there in April and saw nothing but green water. I did not sound, however. In fact I have seen nothing but green water from there to nearly up to these islands, all the way across, north or south, or whichever way I may, all or nearly all was green water — only now and then a small patch of blue — I cannot account for it unless the Banks have shifted to the eastward. Constant gales from the West have been blowing since the mid. of May. The wind not changing from the 1st of April up to the 25th of May,

and with the constant gales from the West we have
had a very strong easterly current, As far
south as the Lat. of 34 I experienced a strong
easterly set, and also found green water.

I have seen nothing but one that I
could call Sperm Whales. Then it was blow-
ing a gale with rain and they were much to
windward. I tried hard to hold up, but

could not against the strong gales and currents.

This was near the Ocean Stead ground
and it is the only place that I have seen that
looked like a ^{whole} ground, since leaving it last
fall. I have considerable faith in that
place - still this spring it was covered with
green water.

One month ago I some thought that I
might have acted injudiciously in taking the
route that I did. But I can hear of no
ship that has done anything this last winter either
north or south, and had I another winter
before me, think I might try the same
general route again, subject of course to such
little variation as I might choose, to make.

I intend now on trying the Morris ground
and should I get oil there shall look for
it again in June or Sept. - but should
I not be able to find whales to the mid of
July shall work to the West for the Ocean -
Stead ground.

Five months out we had taken all our oil

since then
And have been eight months since with-
out taking anything "One extreme to the
another" and I think it about time for a
change. I shall not give up the idea
but what we shall get obtain a "set" until
the last day of Oct. If we get nothing by
that time I shall think that our chance is
small for this season.

I hear that there has been quite a num-
ber of sperm whales seen around these islands
this spring. At St. Cruz, Flores
there have been two boats imperiously fitted
about two days ago they saw a whale close
to the land. They went off with the boats
and struck two large ones parted line from one
and lost line to the other. After losing
the line the whale came up close to and
they could have struck again but had no
pins.

So much to be in half fitted
The best way to save line and craft in
whaling is to carry plenty in the boat &
are not apt to lose line if you have more
long that a whale cannot sound it out.

I hear that Mr. Leach & Babney & sons have
also fitted two boats for a shore fishery at
Fajal.

My kindest regards to Mr. Hadley
and Sir believe me,

Sincerely and respectfully yours
G. B. Barber

This letter was handed to one of the firm
by me July 27 or 28th 1869.

Messrs (Messrs) W. Palmer & Sons,
Fayal W. S.
Gentlemen

in accordance with your wishes I will now
give you my views in regard to the alterations
to be made in the ~~Ph. line~~ Acasa, to make her
suitable for whaling,

As the mainmast is too small for the
business, I think it desirable to rig her into
a bark, and in doing so it will be neces-
sary to step the mainmast some four or six feet
further aft. This will ^{make} ~~be~~ a good roll-way
— which is very much needed — between the
mast and mainmast. The foremast and
the house can be cut off some six feet; then
we can carry two boats upon it,

In fitting the blubber room it will be neces-
sary to put in an extra beam beneath the room,
between the two that is already there. This will
give support to the blubber room and strengthen
the ship. Much strain comes against the
side about the water line in cutting a whale
to the leeward — The Union was built
Bks. Willis and Addison obliged to leave the
whaling ground, on account of injuries received
by cutting to the leeward,

I forgot to mention to Mr. Gurns to put

a bitt or post; similar to the one forward, for
shut the chain; put through ^{the deck} just forward of the
main hatch and close to it, amidships or as close
to rail on port side, to secure Head Chain —
Also chock, in bulwarks, with iron house piece
in it, within six feet of forward part of gangway, for the
Head chain to lead through.

We shall need a Stank of bitts or a hundred
bbls, capacity for Head and Cyl; The space
between the mainmast and hatch will be a good
place ^{to set it in} ~~for it to set~~ — One side, of the fore hold
can be fitted up, for the bootstoppers, and the other
for sack and tinning bin, scuttle butt, potato
bin, or anything else desirable.

In arranging for the boats I should place
the after davits at the after end of the house,
the forward davit on port side, abreast the
fore rigging so that the davit fall may lead over
the fore hatch way.

The Davits for both large and small boats
should be $22\frac{1}{2}$ ft. apart — Bearers, 11 ft. apart
forward one $4\frac{1}{2}$ ft. from forward davit

Gun works, for 180 Cal. Pots — should be
8 ft square; including hearth; excluding ca-
lose trough, for which an allowance of four inches
more on deck is to be made. — Pots should be set,
ten inches from hearth; and back twenty in-
ches from front of works, — The width of one
brick at the side of the Pots is sufficient but

Lower down abreast the ^{there} fires should be two
or three

In letting and altering I shall ask for no
change to be made; no article for use, more
than what is really necessary or different from
what I should furnish, were I sole owner;
nothing for show or ornament; no useless
cumbersome article do I wish for; but
tools fitted for service and all the necessary ac-
couterments for catching whales and taking
care of oil.

Should you purchase Gunpowder Bombs;
get the large; — they cost no more — are
just as likely to go in — and will do twice the
execution of the small. I prefer those iron
that the Muzzle shuts inside the shanks —

I suppose that the N.B. lines are as good as
any — Am in favor of them from straps,
are you willing that I should furnish the
strops for the crew during the voyage?

Can I bring them with me when I come
and please inform me of the amount you in-
tend advancing men on shipping at Hval,
As it will not be desirable for me to re-
main at Hval long; before sailing you will
please inform me the better when you have
the vessel ready for sea; and I will endeavor
to be on hand.

I feel highly flattered in your preference,

in appointing me to the command of the Acaso;
for which, please accept my sincere thanks
In my future conduct I shall strive to merit
your esteem and approbation, and hope I may
prove worthy the trust and confidence you thus
~~repose~~ ^{place} in me.

I cannot say, how much oil we ~~shall~~ ^{may} get;
or what we shall do; but; this, I can say;

"We shall try" and if a fair knowledge of,
and a strict attention to, the business, will in-
sure success - and I believe it ~~does~~ ^{will} - then may we
expect for the Acaso to get some oil.

I should you at any time wish to consult me
in anything in regard to the vessel I shall be hap-
py to comply with your wishes, From this
and what I have heretofore said you will
have a general idea of my views,

On my arrival at New Bedford I shall expect
a line from you, among other particulars stating
the time of the sailing of the Acaso.

and Sirs Oblige
Your Most Obedt Servt
C. B. Borden

Master BR Ocean Steed

1
Fayal July 28th 1869
Lorenzo Peirce Esq
New Bedford.

Dear Sir

I am now
about leaving here for the W. or the other
Ocean Stead Ground - am in hopes of
getting some oil before I come home
- say in a day, have obtained 100 re-
cruits here - I have obtained only
50 Bbls of Oil since leaving here
two months ago - seen whales but
once for the last eight months.

I enclose your Draft on Chase & Lab-
meyer & Co of Boston drawn ten days
after sight for \$160 One Hundred and
Sixty Dollars, currency - I have not

ing of interest to write about
D My kindest regards to Mr. Hadley
D And Sir Oblige

Yours, Most respectfully
G B Borden

Master Bk Ocean Stead.

Br Ocean Steed Aug 10th 1869

Meess. Chas. W. Tabney & Sons
Fajal

Gentlemen

while at Fajal I forgot to ask if you had a good
chronometer for the Br Steed,

Also about charts

Will you

be so good as to inform me what you
have, and for fear that "spade -

poles and boats - masts may be overlooked

I would hereby call them to mind

please answer and dire Oblige

Yours most Obediently

G. B. Borden

Put on board sailing vessel for
Fajal about mid of July;

Bk Ocean Steed Aug 16th 1869

Lorenzo Pearce Esq
New Bedford

Dr Sir

As I have leisure I will send you a line to inform you that we are all well. And although we have seen no sight for oil this season are in hopes of yet getting a cut.

We are now in the Ocean Steed Ground — arrived here three days ago, and although we are early, saw whales the day we arrived. We were in co. with Bk. Tropic — she being to windward raised whales, and took one. We worked hard all day to get up, and as the sun sunk below the horizon the whales went down within a quarter of a mile of the boat. It was extremely aggravating; but it could not be helped; all did their best.

The whales were larger ones, and had the O. S. been a fair sailer we should probably have got a hundred barrel whale.

The sailing qualities are the only poor ones about the Ocean Steed! No better "Sea boat" can be built! — is handy and convenient — and since I calopped her is much better than before and can take care of a whale in rugged weather as well as any one.

I have everything that can be asked for, in regard to boat and gear for catching whales and ^{every} convenience for taking care of oil, that can possibly be had in a small vessel. No vessel can be better fitted for an Atlantic whaler, and if her sailing qualities would only compare with her many other excellent ones no better vessel could be built from the same amount of wood and iron. I must brag on her good qualities as a "Sea boat".

In the "great hurricane of Sept 1864" in the Gulf Stream, when many vessels were foundered — "the schooner S. C. Dodge, was torn to pieces" and the ship "Horn, Morris lost some of her spars" The little "Bk Ocean Steed" was close by "lying like a duck" riding it out smooth and safe, and scarcely "parted a rope yarn" During the entire blow,

So far this season vessels have done but very little, and the general complaint is a scarcity of whales — all the old grounds having failed.

I intend to remain here as long as possible, or until the Western gales set in so strong as to be useless to remain longer. Hoping that I may yet get a good cut. We only desire to see whales and I have full confidence to believe we shall get oil.

Enclosed please find — Draft, ^{at sight} on Christy & Co. payable to your order for \$112⁰⁰ in Gold

Now will please collect the same and place
it to the cr. of Bk Ocean Steed, as also the
Draft I forwarded you from Faval. Drawn
ten days from sight on Messrs. W. D. & Co. of
Boston for \$160 currency.

Trusting that soon you may hear a more
favorable report from Bk Ocean Steed
I Sir, remain your most Obedt. Servt.

G. B. Borden.

"

New Bedford Dec. 22nd 1869

Messrs Chas. W. Babney & Son

Fazal W. F.

Eastman

On arriving home in barque Ocean Steed was disappointed in not finding a line from you, but was more disappointed in not receiving anything by Fredson or I B Everett.

Capt. W. Green has informed me that you have sold the blocks and intend to give up the business. I have written to your house in Boston making inquiries regarding the truth of the above, and received answer that I should have received letters from I B Everett from Fazal, and wishing also to see me about the boats for the Ocaso.

Today I intended to visit B. but on account of a storm coming on shall postpone until tomorrow. Should you conclude to fit please inform me the earliest opportunity that I may have a little time in looking up my officers.

Please also to inform me about your barometer for the Ocaso as Chas. Theron, & Thermometer &c.

The Ocaso needs to be fitted strong in order to cruise in the Gulf Stream in Oct and Nov, — I nearly tore the O.S. to

pieces in cutting a large whale in a few
hours and breaking the main mast so as to
be unfit for use

The *Frederica* would be a good vessel to
cruise there — I do not think that the
business will warrant fitting for moderate
weather in the A. C. but with a good
vessel and a good gang I think that there
is a whale to be found in high latitudes and
in and about the Gulf Stream

Please give me all the particulars
about fitting you can

And Sirs. O. W. H. G.
Yours most respectfully
C. B. Borden

P.S. Please direct to 63 Thomas St
N.B.

W. B. Borden

Not out

New Bedford Dec. 27th 1864
Messrs. Chas. W. Taber & Sons
Bristol W. at
Centerville

I expected on my arrival home in Bk B. to have found a line or two from you giving me some instructions in regard to boat and office for the Bk. Adams.

B. T. getting none and receiving none for the same. I thought after some conversation with Capt. W. Green who informed me that you had offered the Bk. Cholebis for sale, that you had and that you had concluded not to fit or was undecided about fitting the Adams.

I immediately wrote to your house in Boston making enquiry in regard to your fitting the Adams receiving answer that I should have had letters from Petrols per schooner D. B. Everett, and that they wished to see me about the boats for the Adams. I made all diligent search for letters per schooner D. B. Everett but could find none, and in three days after receiving letters from Boston I received another stating that they were hoping and expecting to see me in Boston, on the 23rd inst.

I went to Boston - saw Capt. Burke - went on board the Fredonia - saw and talked with your partner, but could give but little

information in regard to your fitting the *Acacia*.
I could not understand why they wished
to see me in Boston in regard to boats, as in
conversation said they had not an authority to
do anything about them. And the *Pen*
and substance of their wish to see me
was that I might go to *E Boston* and
look at some boats there. Also stated
that they had learned I had engaged me to
to another vessel and had written to her ac-
cordingly. I do not know upon what au-
thority they should thus write you. I have
not engaged myself to another vessel, nor do
I intend to until I fully decided about
your fitting. I have had several offers
but have given them but little attention
as I considered myself engaged to sail for
you, and have expected all along to do so
and make arrangements accordingly.

If you have not given up the idea of fit-
ting I hope that you will forward your instruc-
tions at the earliest opportunity. It will
be impossible for me to get my boat built
before shipped &c while the *Fredonia* remains
at Boston on her usual time and that
the *F* can bring but two boats, and
we need three or four — I think
it will not pay to fit vessels for mod-
erate weather whaling in the *N. E.*

New Bedford June 24th 1870
Messrs Chas. W. Putney & Co
Boston

Gentlemen — Yours of the 19th inst
came duly at hand on the 22nd on my arrival
home from Fall River — In answer
I would say that I do not as yet feel au-
thorized to order boats built for the season,

I have not inquired particularly into
the matter, but the boats will be inside
of the figures I forwarded you — something
depends upon their completeness of fitting.

I am waiting to hear from Fayal, and
have expected here this to have had something
definite from there.

I have had several good offers from this
place and unless I hear something
from Fayal soon shall look around
and see what inducement is held out
in this place — Therefore I
have rejected all offers, depending upon
sailing from Fayal, but unless some
movement is soon made we shall neces-
sarily lose the best part of the season.
I wish to be on the whole ground
by the mid of April.

Yours Truly
C. W. Putney
Care of the Ocean Street

Saw Addison Chasing

Whales

Sperm

Wednesday, Oct. 20th 1869
Came in with fine weather and light
breezes from the N. but with a
short choppy swell, on — at 10 A.M.
saw the Addison boats down
chasing whales. — lowered all three
of our and sent them down where
the Addis were, — at 11 they went
along side of the Addison and
learned from the Capt. that the whales
had not been seen for more than
two hours — then turned on board
and arrived at 1 1/2 P.M. — at 6
P.M. spoke the Addison — she
had taken nothing since we last
saw her.

Lat 40.42

New Bedford Jan. 27th 1870
Messrs Chas. W. Dabney & Co
Boston

Gentlemen

yours of the 25th inst is at hand — you
state that yours. by "Fredonia" was definite
in regard to ordering Boats built for the case
under my supervision, I understood

you to say on my visit to Boston that
you had no authority to act in this mat-
ter, and I can say that I have received
authority or instructions to order Boats built
for the case, I have received

no letters from Fagal by the mails now speak
of, and I wish to ask of you if there

Yours Truly
L. G. Borden

New Bedford Jan'y. 31st 1870

Messrs. Chas. W. Babney. & Co.,
Boston

Gentlemen

The 28th inst. came duly at hand, and by its final clause I suppose it was intended it to end the correspondence on your part,

In your second letter to me you stated that you wished to see me, about the boat for the season. Accordingly I visited your city for no other purpose than to make the necessary arrangements about the boat and other matters pertaining to the fitting the season.

In your office and to you I stated verbally in the presence of witnesses, my readiness and willingness to enter upon my duties and perform my part of the agreement existing between Messrs. Chas. W. Babney & Sons at Haver and myself, in carrying out a certain contract relating whaling voyage in the season.

You distinctly stated to me in the presence of that witness that you had no power or authority to act in the matter and consequently

could give me no authority to build a boat or do any thing else and only requested me to go to East Boston and look at some boats and to ascertain the prices of whaling in 1870, saying, "Unless you feel unwilling to proceed without further in-

instructions or agreement with the house
at Fayal on your own account we see
no reason for not ordering the Boats built
at once." To this I would say
that I have received no instructions
from Fayal in regard to building of Boats
shipping of officers, cargo and advances to
be given them &c as per agreement. Nei-
ther have I received any instructions or author-
ity whatever from you.

Under date of Jan. 28th you say that
the order from Fayal for the Boats to be
built under my supervision was definite!

If so you have neglected to furnish
me with the proper authority to act.

Again you say. "What we intended to
say to you when there was that we would
order the Boats under your supervision but
if there was any doubt in your mind as to the
agreement between ourselves and Messrs (Whitby)
then we felt we had no authority to order
the boats." I do not know what ^{meaning} you in-
tended to convey by the words, "I understood
you to say that you had no authority to
act in the matter." As regards the
doubt in my mind concerning the agree-
ment I distinctly stated to you that I
came to offer myself as ready to carry out
my part of the agreement. As the

order to you from Sagal for the Route
was definite, and you have neglected
to furnish me with the same. I
can see no reason why you should not
be held responsible for any damages
that may arise therefrom, so I have
been at some expense and been some time
detained from making other agreements on
account of this. But on the receipt of yours
of the 12th inst and learning that your order
from Sagal was definite and you have
neglected to furnish me with authority to
act on behalf of the ~~the case in question is by~~
~~this act on your part therefore~~
~~the conclusion that the agreement be-~~
tween C. W. Debnor & Sons and myself becomes
~~null and~~ annulled and that I consider
myself at full liberty to make other ar-
rangements.

Yours Truly
G. B. Debnor

A G Boyden Esq^r

Bridgewater

Dr Sir

Our daughter - aged sixteen - we wish to place in the charge of some competent and responsible person or persons who will be responsible for her conduct while we her parents - are absent on a whaling voyage.

We also wish for her to obtain the advantages of your most excellent school, in preparing her for learning. At present she is attending the Parker St, Grammar School in this city - C E C Mosher principal - is studious and ambitious to become a teacher. - has always stood in this school - say two years - 100% for attendance and deportment - can bring good recommendations from her principal and teachers as a good scholar.

We should not think of sending her to your school until she had graduated from the High School in this city were it not for the reason that her mother goes to sea with me and we think as she intends com-

ing to your school in order to finish
her education she had better come
now and not be changing from school
to school and place to place, while
we are absent,

We wish for her to be punctual
in attending church and sabbath school
as she ever has been, and spend her
evenings at home wherever that may be,

What I mean is; "that we do
not wish for her to be out nights"

If the facilities of your school
will answer these requirements, or if
she can be placed in some private
family and obtain the advantages
spoken of, you would confer a
favor by answering this, and appoint
a time and place for a verbal in-
terview if necessary. And if our daughter
must visit you before examination
day? and any and all questions that may
suggest themselves pertaining to the
matter before us

and Sir Oblige

yours respectfully
E. B. Borden

please address to 63 Thour St. N.B.

New Bedford Feb. 18th 1870
Messrs Chas. W. Deane & Sons

Hayes

Gentlemen

Your kind favor of the 15th ult., came duly at hand yesterday and I can say that I sincerely regret that any misunderstanding should have taken place in regard to the census. But rest assured gentlemen that I have acted uprightly and honorably in this matter and feel to blame none except the House in Boston who should be held responsible for all misunderstandings.

Not receiving anything from you on my arrival home and on the last trip of the *Arestonia* I wrote making inquiry of the House in Boston regarding the matter. In answer they stated they

wished to see me in regard to the Boats for the census,

Visiting Boston on the 23rd of Dec, I stated to Mr. May that I had come down according to request to see about the Boats for the census,

He answered that he had no authority to act in the matter and could do nothing about them. I thought it strange after complying with his request that he should answer me in such a manner

but more strange that nothing had been done for the boat. Although it would be late when the *Fredonia* returned again. I was willing to wait for her to do so in order to honorably meet and fulfill my agreement with you, and stated to him that I came for the purpose and was then ready and willing to fulfill the requirements of the same and wished for him to forward to you my readiness to fulfill the same.

Thinking that he had no power to authorize me to Build Boats I felt willing to wait until such time as we might hear from you and made inquiry as regards the most expeditious way of communicating with you. And when I wrote you, I supposed the House in Boston had no authority to act in the matter.

On the 19th of Jan, I received a line from Boston stating that their letter to the *Fredonia* was explicit in regard to having Boats Built for the *Acacia*. I suppose you then were letters to you (making inquiries in regard to Boats) instead of being from you to them as instructions. On the 20th they wrote that the letter to them from W. Babney & Sons was definite in regard to ordering the Boats Built for the *Acacia*. Still they did not

forward me any order or instructions in regard to Boub or anything else.

Knowing that as I had offered myself as being willing and anxious to carry out any instructions from them in regard to the contemplated voyage. On the 28th I received another line but no order or instructions to proceed and all this time parties were in waiting to build Boub as soon as I should receive an order.

I also had a man in view for mate but receiving nothing in regard to these things from you he thought it not prudent to wait longer, after waiting several weeks and consequently left himself at liberty to engage with other parties.

Now what has the House in Boston withheld from me the proper power and instructions in this matter? Knowing as they did that I was ready to fulfill them, they at first denied of having any authority then afterward admitted that the order to them by the Freedmen which shows that they held the order when I saw them in Boston.

The time was passing and I saw no more prospect of obtaining orders and instructions than I did the month before. The best chances for ships and officers

were being taken up and in justice to myself I did not consider it prudent to wait longer depending upon uncertainties therefore in answer I wrote that by not receiving orders and instructions from them I considered our agreement void and felt at liberty to ship with other parties

Believe me when I say I deeply regret that an misunderstanding should have taken place

Yours most respectfully
E. B. Borden

New Bedford Feb. 18th 1870
Messrs Chas W Babney & Co
Boston.

Yours of yesterday is at hand and
would say that the letter you speak of
from C. W. Babney & Co is also at hand
you call ~~my~~ attention to mine of
Jan 24th. All I can say is, ~~in~~
~~regard to that~~ that I was not aware
until I received yours in answer to mine
of the date you mention, that you held
the power ~~and~~ to authorize me to
have the Boat Built in which
you say their letter to you was definite
in regard to the boat.

You know that I came to you
and voluntarily offered to fulfill my
part of the agreement existing be-
tween C. W. Babney & Co and myself,
and wished for authority to proceed in
the matter. You know also that you
had the authority and refused to
furnish the same ^{to a month of more} and after waiting
and frequently writing to inform you
that I had no authority to proceed act
and having been at ~~some~~ ^{some} expense
~~more than one month~~ and kindling myself
testificate of power and authority to proceed.
I considered our agreement annulled by

by your act in not furnishing me with
the proper authority and I shall
therefore look to you as I said
before for any damage that may
arise by a nonfulfillment of the
agreement with C. W. DeLong & Son
and myself - Yours most truly
G. B. Borden

New Bedford Feb. 21st 1870
Messrs. Chas. W. Salney & Sons

My dear

Gentlemen

Your kind favor of the 15th ult. is at hand
also yours of the 25th via ^{Freight} ~~Freight~~

Believe me when I say that any
misunderstanding should have arisen in
regard to the ~~Acaso~~ Also believe me
that I have tried to act uprightly and
honorably in this respect

On my arrival home not finding
letters from you as I expected and with
some conversation with Capt. Green of North
Colchis I was lead to believe that you
was in doubt about fitting the ~~Acaso~~
Capt. Green informed me that you had of-
fered the Colchis for sale and that you
intended to get out of the business.

Not receiving anything by Frederick
or Schooner S. B. Everett I began
to feel rather uneasy about the matter
and accordingly wrote to your House
in Boston making enquiries regarding
the same. I received in answer their
wish to see me in Boston about the boat
for the ~~Acaso~~, — Went to Boston and
according to request and was then informed

to Mr. How that they knew nothing and
about the Bount as they had no authority
to act.

I informed them in Boston that I came
forward with the full purpose of fulfilling
the agreement between us and tried
to say every word that I was in real earnest
about the matter. I enquired the manner
of conveying word to you in the most expeditious
manner and tried to urge it upon them the
importance of making some forward move-
ment in getting Bount & Co in time for the
Fredonia on her next trip. I supposed
on going to Boston that they had authority to
assist me in the procuring of Bount officers
& Co. But found my visit a failure as
they informed me that they had no author-
ity to act. I wrote to you on the
strength of this information resolving
to wait until I could hear from
you.

I received their letter of Jan 25th that I
had my idea that the House in Boston
had instructions from you to me,
more than one month had they held these
instructions and withheld them from me
knowing as they did that I had applied
for instructions and was waiting anxious
ly to obtain them.

What could I expect? nothing at
all from you, and no encouragement
from the House in Boston! They keep
ing from me instructions ~~from me~~ that
I needed to carry out this enterprise
The ^{best} ship was being taken up, ^{the} officers
engaging and soon I should find
myself without a ship or with
an inferior one with poor officers
Being often importuned and seeing nothing
that looked encouraging from the
House in Boston and being late
too late for the season before I could
expect to hear from you I in justice
to myself, agreed to go in another ship

Not completed Not forwarded

and still keeping from me the desired authority to build boats &c as I had desired them to do while I were in Boston.

I had a Boatbuilder engaged to build as soon as I should receive orders to do so.

I also had made partial arrangements with a man and 2nd mate to join the crew.

But waiting week after week and receiving in furtherance of the intended project they have finally broken up the arrangement.

Now what was I to do? All was doubt and uncertainty in regard to your fitting — The season was passing away — ships and officers were being taken up — no instructions from the House in Boston — I had applied for — and still they were withheld — and no word from you. What could I think of this act of keeping from me the desired instructions. Were they using discretionary power from you? or were they aiming to attain some private end? For over one month had they kept the desired instructions from me? I remained in suspense and anxiety! And not until I had informed them, that by refusing to forward me the instructions I considered our agreement annulled and that I felt at liberty to agree with other

parties I ~~considered~~ our agreement
and after I had done so did they
send me instructions (indirectly) to build
boats. Seeing no prospect of car-
rying out our projected plans and in
justice to myself did not consider
it prudent to wait longer in uncertain-
ties. Considering that our agreement
was annulled by the act of the house in
Boston I felt myself at liberty to en-
gage with other parties which I have
accordingly done holding the firm in
Boston responsible for all damage
that may arise from a nonfulfillment
of our agreement.

I can assure you gentlemen that
it has been as sad and severe a disap-
pointment to me as it can any way be
possible to you.

Please accept my thanks for
the kind feelings extended to me in
your letters and gentlemen
believe me ever

yours most respectfully
